Dear Central Point Software Customer,

Thank you for your purchase. Like you, we recognize the importance of making backups of software so you will find that this product is not "copy protected" in any way.

In case you are not yet familiar with the copyright law as it relates to making copies of computer software, we'd like to take this opportunity to discuss it with you.

Many manufacturers of computer software copy-protect their products to physically prevent people from making copies and giving them away or reselling them. **Under the copyright law, you have a right to make copies to use in the event your original disk no longer functions. It is important to note that this is the only right to copy afforded to you under the law,** and both we and other software publishers request that you do not make copies for any other purpose.

Some states have enacted or are considering enacting "Shrink Wrap" license enforcement acts which may or may not affect your right to make backups of certain software products. We suggest that you check your state law to see whether it applies to you in this regard.

As part of an industry-wide effort to inform people of their rights under the U.S. copyright law, we have enclosed a copy of ADAPSO's "Thou Shalt Not Dupe" flyer. We hope you will take a moment to read it before using our product.

THANK YOU again for your purchase! We know you will find using your computer much more pleasant knowing you have safely put away backups of your valuable software.

Sincerely,

Michael D. Brown  
President

## Copy II 64/128, Version 4.0

The following products have been submitted as 5 1/4" "back-up-ables" by our customers. Special instructions may be required to handle some of the more sophisticated protection schemes. You may need to use the parameters on side 1 of the disk, parameters on side 2 of the disk, or a combination of manual bit copy and the parameter on side 2. **These directions are noted with a number in ( ). See the reverse side of this sheet for the corresponding instructions. If there is no number in ( ), just use the default settings in Manual Bit Copy.**

Copy protection schemes do change frequently. If you find you can't backup your version of a particular program, let us know — we'll try to include it in a future update, or you can contact us to see if we have any in-house parms available. COPY II 64/128 is very sensitive to drive alignment. If you experience problems in making backups, you may need to have your drive aligned.

**IMPORTANT NOTICE:** Under the Federal Copyright Act, an owner of a copy of a computer program is entitled to make a new copy for archival purposes only. Some software is licensed, not sold. Subject to state law regarding the enforceability of that license, your right to make archival backups may be limited, or not exist. We suggest you check whether your state law applies to you in this regard. This product is supplied for lawful purposes only and you are not permitted to use it in violation of federal copyright law or state software license enforcement laws. By using this product you agree to be bound by the terms of this notice.

- **Protect your software investment!**

Make backup copies of protected and unprotected computer programs. Central Point's state-of-the-art technology enables you to make copies of many of the most sophisticated protection schemes! You'll have a backup handy should misfortune befall your original disk.

- **Put it in gear and go!**

COPY II is completely menu driven. Select which function you want from the main menu and COPY II tells you what to do all the way. No need to know "computerese." No knowledge of protection schemes required. COPY II even knows which mode you're operating in (64 or 128) and which drive you're using (1541, 1571 or 1581) – automatically!

- **Speed it up!**

COPY II can backup your disk in two minutes on a single drive system. Or take advantage of your two drive system, make backups in just one minute! Format a new or re-used disk in less than ten seconds. Load your programs several times faster using the Quick Load feature.

- **All new utilities!**

Recover accidentally deleted files, rename files, copy files or an entire disk, verify disks, view and change data using the SECTOR EDITOR, and much more!
