CS update newsletter #001
At last this issue has arrived !!!!!!!!!

Hi Gang !

This is the format for the monthly newsletter that will be making and appearance between issues of CS. Some will look like this one and some will be done on geoPublish and printed out with a c64. At least this way you will know what is going on inbetween issues and you will also know that CS is still here !!!!

Again, sorry for the delay with this issue.

CS36 disk contents

Side 1 :
It's Magic (I)
- full version (now PD)
geoBEAP v2.0
- see the geoTELEGRAPH section for details.

Side 2 :
Loadstar 211
- sample issue of this fine US diskzine. This issue actually comes on two disks but this is only a sample of the first disk/first side. A full description will be in CS37.

CS36 Naught Bitz disk contents

Side 1:
Sorority Vamps
Space Vixens
Hatchet Honymoon
Super Sex Games
Touch Me

Side 2:
Strip Poker
I Want Your Sex
Blue Angel 69

CLASSIFIED

Terry from Cardiff has an SX64 up for grabs and a spare keyboard. The SX64 seems to function okay but the screen won't come on. Offers to the editorial address please.

SuperCPU Orders

Here is the response from Maurice Randall after I asked him about all the items I have on order from him *<< Tell them it's not you... it's me. I'm slow. :) Actually, I'm still working on orders that CMD gave me. But probably the next batch of SCPU's will have yours in it. >>* Well, there you have it, Maurice is busy so we will all just have to wait a bit until he gets sorted out.

IDE64

I know have the IDE64 device and I hope to be testing it out in time for the next issue.

Retro Replay

Another device hits the Commodore - now available from CS directly. I have one spare RR in stock for sale at £44.

This comes from Jeri Ellsworth at http://www.geocities.com/cm_easy/comone.htm

CommodoreOne Overview
The estimated price will be only $200 USD. As sold the CommodoreOne will be a motherboard ready to mount into a Micro ATX style computer case. Ports will match the holes of the case as well as additional port connectors will be included for addition through punch-out ports on the case you pick. Connectors on the CommodoreOne will be ATX style. The CommodoreOne board is designed for a 5vDC power source and accommodations have been made to keep the machine as 'laptop/portable capable' as possible. The main processor of the C1 is a (65c816 processor running approximately at 20 MHz) the 65c816 is a 6502 compatible processor with a 24 bit address range extra instructions that access the full memory range are added to the 6502 core. The system bus runs at 50Mghz, the 60 hz CIA clock of the system is provided by internal circuitry. Secondary 6502 processor for i/o support. SuperVIC Video Capabilities. VGA monitor output. VIC-II compatible in all video modes 60hz/50hz emulation is software selectable. Classic Emulation & SuperVIC Mode is software selectable Extended video modes as well as combination modes with classic VIC-II modes are possible. Memory addresses of features (character matrix, screen memory, color RAM, etc.) are each 24 bit addressable (except for the color palette which resides inside the chip's memory) 16MB video RAM with adjustable mirroring/or relocation...........

.........there is so much more to tell you but it will have to wait until CS37
