

CORNERSTONE NEWS

VOL.2 No. 1
P.O. Box 259,
Caringbah, N.S.W. 2229
Phone; (02) 520 5037

Dear Enthusiast,

Welcome to this, the first edition of our new look Cornerstone News. This edition marks the start of our second year of publication.

Many experts assured us that we would never see the end of the first year.

As editor of Cornerstone News, I'm supposed to come up with something witty and profound at least once every six weeks or so. Have you ever tried to be witty "on cue"? Consequently, I've been sitting in front of this keyboard for nearly an hour now, trying hard to think of something to write that would be considered fitting for an occasion such as this.

As usual, I'm unable to think of anything even remotely profound, let alone witty!!

As I said, many so called experts told me that we'd never see the end of the first year.

"Your members won't support you." they said. "You'll never get it off the ground", they said.
Rubbish!!

Firstly, because of your efforts, our membership has increased more than tenfold since last July!

Secondly, nearly every member has purchased at least one program from the club at some stage or other in the last twelve months.

And why not! When you bought direct from Cornerstone you paid a heck of a lot less than what you would expect to pay through other outlets. What's more, the tiny profit margin enjoyed by "the club" ensured that "Cornerstone News" stayed alive and well.

We're now able to offer the "top ten" software that we promised, at possibly the lowest price in the country. Note that we no longer charge separately for packing and postage like the other mail order companies. That's a big saving to start with. Up to five dollars in many cases!

Our next step is to increase the frequency of Cornerstone News, and the only way we can achieve this is to ask you once again to do your utmost to support "the club".

Remember, if you've decided to buy a particular program, buy it from yourself.....buy it from Cornerstone.

To all of you out there, I wish to say thank you... thank you for supporting us in the past, and thank you for supporting us in the future.

Regards,
Graham Webber.

WIN A 1541 DISK DRIVE!!

Cornerstone News has come of age. As you can see, we have a new format. I like it, our next door neighbour likes it, and the missus thinks it's O.K. too. That means that it must be better than it was. We've finished experimenting with all the different styles, and we're going to stick to this one. Now it's on a glossy stock.... ("stock" is a word that I learned from the printer...).

Also we have advertisements from commercial sources for the first time ever.

Take a look at their prices. Very Keen indeed!! Please note that we have been rather particular about who we have invited to advertise in our pages. We still want to be sure that all of us get the very best deals available, and we want to be sure that we're dealing with only the most reputable companies.

Please support our advertisers whenever you require a product of the type that they offer. After all... they pay half the bills around here, which means that they support us, which in turn helps to keep the software prices way down low. Surely it wouldn't be asking too much to at least call them for advice ... would it!

Something else is different about Cornerstone News. At last we are in a position to offer "top ten" programs!!! We also have lots of educational and business titles too.

As has always been the case, we will be offering certain programs at super hot special prices. Turn to the back page to find out what's on special this month.

Naturally, all the programs carry the manufacturers usual warranty.

As usual, we shall continue to present the free classified advertisements, so if you have a few programs to sell,

CONTINUED ON PAGE 3

OVERSEAS NEWS

Commodore's overseas launch of the new Commodore Personal Computer seems to have been a howling success. According to Britain's Commodore User. "the confident slogan on everybody's lips was 'the price is right', even though the time may not be quite right!"

Naturally, the machine is designed to compete directly with the IBM PC and all the other IBM look-alikes that seem to be freely available now.

There were two types of machine released in Britain. The basic machine (PC10) featured monochrome monitor, twin 360K floppy drives and 256K of RAM expandable to 640K. The up-market version, (PC20) featured a 10 meg. Winchester hard disk, and only one floppy. I believe they also include a number of expansion slots for IBM type boards, and apparently there is also an 8087 floating point processor option. That should speed things up a little!!

Naturally, both machines offer the industry standard MS-DOS, Microsoft format for the disks and the Intel 8088 16 bit chip. This means that nearly all programs written for the IBM PC will run on the Commodores. This, of course, allows access to an unlimited amount of ready made software that was originally designed for the IBM system. Titles such as Lotus 1-2-3, Wordstar, DBase III, Framework etc. should steam along quite happily on the Commodore machines, which cost considerably less than the Big Blue offerings. Since the British release, Commodore in Australia have released the same machines.

According to Commodore, these new models are priced to make a big impact on the business market. However, whether or not they'll be able to take much business from makers such as Olivetti, Compaq, Kaypro and other already established compatible manufacturers, is a question that still remains to be answered.

Further news from the U.K. indicates that there has been plenty of early software support for the new Commodore C128 machine. Some of the major British software guru's have indicated that they will be releasing plenty of programs for the new machine, even though many of them will be re-hashed 64 stock. Even so, the one twenty eight offers many new features that the writers should be able to take advantage of, which means that even the re-hashed stock should be far superior to its C64 counterpart.

Business programs in particular will take advantage of the eighty column display, and we can expect larger spread sheets and better word processors. Perhaps the new programs will also be capable of running on the additional Z80 processor under CP / M.

Let's not forget that Commodore has also made promises to support the machine with plenty of new software. So, in theory at least, we can expect plenty of good programs to emerge from that quarter .. can't we???

Computer camps seem to be in vogue at the moment. The camps offer a couple of hours computer tuition a day, coupled with sport, entertainment and numerous other creative activities such as drama classes and film making. The courses are mainly aimed at students under the age of eighteen, and cost in the vicinity of three hundred dollars a week, which includes full accomodation and three meals a day. Sounds like a good way to learn a new skill and promises to be interesting, informative and darn good fun to boot!

Do you own a Commodore 64 or Vic 20?

To turn your computer into a strong communication instrument you should have a

CICADA 300C

HINTS and TIPS

We've got quite a lot of hints and tips for you this month. Many of them were sent in by readers, and some of them appeared in various magazines. Even so, we present them without embarrassment, because it's a good idea to have all those tricky little routines available in one place for easy reference.

Disable RUN / STOP - POKE 808,251.

Disable LIST - POKE 775,0 or POKE 774,131:POKE 775,164.

Disable SAVE - POKE 818,226:POKE 819,252.

Cold Start on ERROR - POKE 768,226:POKE 769,252.

Disable Keyboard - POKE 649,0.

Cold start from within program - POKE 770,226:POKE 771,252.

Cold start on LOAD command - POKE 816,226:POKE 817, 252.

Cold Start on SAVE command - POKE 818,226:POKE 819,252.

Cold start on LIST command - POKE 774,226:POKE 775,252.

Cold start on any key - POKE 655,226:POKE 656,252.

Turn off screen - POKE 53265,11.

Recover screen - POKE 53265,27.

Repeat all keys - POKE 650,128.

Cold Start Kernal Routine - SYS 64738.

Cold Start using RESTORE key - POKE 792,PEEK(65532):POKE 793,PEEK(65533).

UN-NEW - POKE 2050, 1 then enter "O" then RETURN then LIST.

Vanishing line numbers - POKE 22,35.

Bell Tone - POKE 54273,70:POKE 54278,249:POKE 54296,15:POKE 54276,17:POKE 54276,16.

Read crashed graphics line number - POKE 53272,21:POKE 53265,155.

Enhancements for Commodore 64 SPEECH 64

\$69.00

New from Currah, the speech synthesiser for the Commodore 64 Speech 64 is ready to talk immediately on power-up, has an infinite vocabulary and extra BASIC commands. Speech 64's advanced features will give you, your family and friends lots more fun with your computer.

Speech 64 is easy to use! It needs no software to be loaded, it does not steal RAM from the BASIC operating system, or stop arcade style action.

With extended BASIC commands like SAY and text to speech facility, Speech 64 can be programmed in plain English, just like this: SAY "to say anything you want".

You can choose from two different voices, each with programmable intonation, and other commands control the voicing of keys as they are pressed — a useful educational aid.

Speech 64 comes complete with full documentation and two free full colour posters.

Other hardware for the Commodore 64
Stonechip cassette interface **\$29.95**

At discretely computer shops or mail order from Dolphin: Mail \$1.20, cert mail \$2.80, overnight courier \$7.00. Enclose cheque money order, Bankcard, VisaCard, Mastercard details.
All prices include sales tax. All products guaranteed.

THIS MONTHS FREEBIE

This month's freebie originally appeared in RUN magazine and was kindly sent in by Barry Madden from Sydney. Thank's very much Barry. The program is an extremely useful routine that allows you to print out your listings in a friendly manner that avoids the need to decipher the Commodore graphic symbols representing such commands as "cursor down", "clear screen", "space" and so on. When you need to produce hard copy of a program, load this routine before you load the main program. Now when you LIST, either on the screen or on a printer, you will find that the Commodore graphic symbols have been replaced with easy to read non-graphic instructions. For example, the reverse heart character will have been replaced by [CLR], and ten cursor right characters will have been replaced by [10 RIGHT].

We'll be making extensive use of the program over here at Cornerstone, because we've been having a few problems with the listings that have been appearing in the news sheet.

WIN A 1541 DISK DRIVE!*CONT.*

you'll get top results through this column. Perhaps you need to buy a second hand printer, or maybe a plotter. This is where you'll find one for sale. By the way... when you send us an advertisement to print, or any other correspondence, please include a telephone number. You'll get a far faster response.

Let's not forget the free programs. They'll still be coming up every edition. This month's is a beauty.

Hints and Tips has always been an important column. We're pleased to say that this also remains, and with a little help from you, can be further expanded.

Cornerstone News is your forum, and you are invited to submit an article of your choosing for publication. Every month we will be presenting a feature article, and if you are the author, we'll pay you twenty dollars for your effort, providing that it runs at least a half page, and isn't considered as an advertisement in disguise. A half page, incidently, is about five hundred words.

Readers will also be invited to take part in various competitions throughout the year. We have already given away a printer and ten boxes of disks, and in this edition we will be giving away a free disk drive to some lucky reader.

I sincerely hope that you enjoy this month's copy of Cornerstone News. We think that it's the best we've ever produced, and we hope that it's the first of many that will be equally interesting. Just a reminder ...we still need more readers. Cornerstone News is a free publication, and as such is there to be enjoyed by all Commodore 64 users. If you know of a user who doesn't receive his or her own copy, let us know about it, and we'll make sure that they receive all our future editions.

REVIEW — SKAI 64 DISK DRIVE

Q. What's smaller, lighter, cooler, arguably faster and probably more reliable than a Commodore 1541 disk drive??

A. Ummm ... Almost anything!!

No, dummy, ... a SKAI 64 disk drive, that's what!!

Lets have a quick look at this thing. Hmmm ... the packaging is about the same, lots of moulded poly in a cardboard sleeve, something like the Commodore. Shouldn't be any problem with transport then, plenty of strength where it's required. One point scored, so let's get it out of the box.

What have we here?? This can't be a disk drive, it's too small.

Doesn't seem to weigh very much ... maybe they left something out!

Nope...it's all here, and really very impressive. Good manual too! Hey...what are these switches on the bottom for? Good grief!! With the switches I can change the device number of the drive. No more messing around with a hot soldering iron, or even worse, with a device changing software routine that you just know will be overwritten by something else just when you need it most! Another good point for the SKAI! Take a look at the gate. It's a lever style affair that's very simple to use and absolutely positive in operation. No more tears in that department. You beaut! Let's get it out of it's case.

Solid metal construction, metal housing, high quality circuit board, RF shield, ...er... where the heck's the transformer? Ah-ha! So that's the secret! No transformer! No wonder it's so light. This machine's sneaky — instead of a bulky transformer like the 1541 it uses a switching power supply. That's why its a lot smaller, only 330 x 163 x 70mm. That means that it runs a lot cooler too. Very, very, good!

What about the drive mechanism. Wow... look

at that! It's got proper mechanics, just like you'd expect to find in a business style PC drive! It's even got a speed adjustment device! I'm impressed!

O.K., lets give it a run. No problem connecting it to the 64, uses the same style of cables. The printer plugs straight into the back too, so it's fully compatible in this respect. Let's try it with a few programs. Bingo! It works!

Hey! It's quieter than the 1541. No crashing and bashing! Plus it runs almost every program that I own. Goes O.K. as device nine for file copying with Starpoint's Disector as well. According to the distributors, the drive has been tested with over 2,000 programs, and works successfully with 99.5 percent of them. That's O.K., I can live without the other half percent. They also tell me that for an extra \$14.50 I can take out a special twelve month extended warranty cover, too. That sounds like good value, my last 1541 alignment cost me a small fortune in downtime!

As far as speed is concerned, the SKAI takes a tiny little bit longer to read a huge sequential file. BUT... it has a much faster seek speed, and the head virtually flies over the surface of the disk in search for specific tracks and sectors. This means that database programs such as Superbase 64 run considerably better on the SKAI, which is an obvious advantage for heavy data base users such as myself. On occasions my 1541s go to sleep while they try to figure out where to dump the next block! No problem with the SKAI!

All in all.. thumbs up to the SKAI 64. As an alternative to the 1541 it has to be considered, especially if weight, temperature, compatibility, user friendliness and reliability play an important part in your deliberations.

Good on ya, SKAI.

Young **Sue Gardner** of the Sunshine Coast, (071) 44 2719 has a very good Commodore 1524 printer for sale. It has had very little work, and she's selling it because she bought a Juki daisy-wheel. Asking price?? Only two-fifty bucks. That's very good value.

Nelson Bay Commodore Users Group (B.U.G.) is looking for new members. If you live up that way (I wish I did!), drop a line for further details to: **Wayne Herring, P.O. Box 308, Nelson Bay.**

Andrew Gleave, (08) 337 6115 has lots of games to sell and swap. He also needs to know how to solve problems in Maya Adventure, Castle of Mydor and Thermonuclearwargames. Can anybody out there help?.

F. Fredrickson has an 803 printer and is looking for a program that will allow him to make cards, signs etc. Phone him on (02) 639 7873.

Peter Bungay, 8 Paul Street, Wagga Wagga, 2650 wants to buy POKER 64, THE FONT FACTORY, CALCKIT and either DISECTOR or DISKMAKER. He'd also like to know how to disable the INST / DEL key. Anybody awake down there???

Matthew Molineux, 21 Junction Road, Clayfield, 4011 would like to buy a complete second hand Commodore system. Trouble is, his budget is a little tight, and he can't afford to pay a squillion dollars. I know there are a few user groups out his way that receive this journalistic gem ...so how about it fellas!!

Julian Crawford of Paddington (02) 331 6505 reckons he has about a thousand dollars worth of software for sale ...all for \$75.00. Is this a joke or something!!! Best you give him a call.

If you live in Adelaide, and you need a printer / plotter, give **Doug Underdown** a call. He has a 1520 for sale at \$140.00. Also Choplifter and Combat Lynx (turbo load versions). Phone (08) 248 2166.

Tim Fraser, 12 Flora Avenue, Bayswater, 6053 is looking for a true RS 232 for use with non Commodore peripherals. This must be in your department, Paul!!

Queensland reader **Greg Geerssen** would like to swap a bunch of games, tape only. Try him on (07) 266 7814.

If you need a copy of Disector (didn't I type that word earlier?) or the Program Protection Manual Vol. 1, you should contact **M.F. Blayney, 72 EW Sqn, Borneo Barracks, Cabarlah, Qld. 4352.** Both are \$35.00, and he has only one of each for sale.

Mr. G.R. Skipper, (03) 551 5262 has a 1520 printer / plotter for sale for just \$125.00. That's good value, too.

Maybe you have a problem solving CLASSIC ADVENTURE, and maybe you live in Victoria. If that's the case, you could do worse than contact **Campbell Adcock** for a solution. RMB 258, Watchem, Victoria. 3482. Phone (054) 98 5560.

Tim???, P.O. Box 917, Ingham, Qld 4850 has lots of games to sell, mostly on tape. He would also like to swap programs on disk. Should be worth the stamp, eh!!

Patrick Devlin of Gynea (02) 524 1631 is looking for a copy of SUPER-CLONE, MR. NIBBLE or DISKMAKER. He would like to trade some top quality programs for one of the above utilities.

Brendan McAlister, (042) 95 1382 has problems getting into the house in Bastow Manor, and would like to contact somebody in his area who can help him.

"Doctor" **Bill, of 9/162 Byrnes St., Mareeba, Qld. (070) 92 2097** reckons he should be in the "ASYLUM" because of all the problems he's been having with it. Can somebody please give him a call, or drop him a line.

Rev. Dave Cooper, 98 Gardiner Road, Orange, 2800 is starting up a local user group, and would love to hear from interested hackers. He also has a number of copies of a good touch typing trainer to sell, which are available for extremely reasonable prices.

Matthew Menzies, Total Roadhouse, Cooma West 2630 has a problem with a program called "M.O.B. MAKER" that he typed from a British magazine. Seems he keeps getting an ILLEGAL QUANTITY error in line 150. Anyone assist??

Tom Price of Lane Cove (02) 439 3331 would like to contact anybody using the MIDI interface with synthesizers and drum machines. Any other muso's out there??

Robert Norman of 6 The Parkway, Paradise. S.A. 5075 has a copy of Bastow Manor and needs to know the SYS number required to get it to run. Ummm!!

Martin Gessner, 9 Altona Avenue, Forrestville, 2087 can sell you as many reset switches as you like for just five bucks a piece. No serious user should be without one.

Finally, our Happy Hacker, **Stuart Effeft**, is still anxious to find new members for the Adventure Club. You get a free magazine, and lots of solutions for those really tricky problems. So far the club seems to be a roaring success, and is well worth joining. Drop **Stu a Stamped addressed envelope, and you'll hear from him directly.** Adventure News, MS 1136, Toogoolawah, Queensland, 4313.

THE COMMUNICATOR

The communicator is a complete communications package for the Commodore 64.

It features a Sendata 75 / 1200, 300 / 300 modem, with telephone, that connects to the user port on the C64.

The software enables you to access VIATEL and offers five further options. By selecting one or another of these options you will be able to access other data bases - including those requiring an 80 column screen. You can call up bulletin board services or transfer data between computers. Furthermore you can now 'download' software from MICROTEx 666.

The communicator package, on disk, is fully guaranteed and is offered to Cornerstone readers at the special price of:

\$288.00 incl. p & p

Send the coupon with your remittance to:

Back up & Stay up!

Back up Commodore with the new ISEPIC

(pronounced Icepick). This revolutionary hardware/software combination allows you to bypass (Commodore-64) any disk protection scheme. Now you can back up all your precious Commodore 64 software! The ISEPIC saves the protected program as it runs in the 64's memory which then becomes accessible for complete inspection and alteration. ISEPIC can automatically create a compact, auto-booting, fast-loading file which is completely unprotected and self-contained. Comes complete and ready to run, just plug into expansion port.

- Programs load faster than originals
- Eliminates drive "knock" due to protection schemes
- Place multiple programs on a single diskette

\$149

Commodore stays up and running with SKAI-64

The superior 'SkaI-64' disk drive runs fast, runs cool, runs more reliably and is easy to use! No need to worry about head re-alignments and overheating which plague other Comm. 64-drives, ours is guaranteed. Contained in a metal casing which reduces RF radiation and has externally mounted device address switches.

- Over 2000 programs successfully tested
- Upgradeable
- 10-day money back guarantee
- 6 months warranty
- Compact & easy to use
- Long & reliable drive-life

This Month's Specials

This month we have some really great specials with Two terrific extras thrown in for good measure!!

FIRSTLY, if you purchase any program from the price list appearing on this page, you qualify to be in the draw to **WIN A COMMODORE 1541 DISK DRIVE**. That's right, some lucky purchaser has to win a disk drive in the next four weeks!!

SECONDLY, all our prices **INCLUDE** the cost of packing and posting. No need to add the extra five dollars to the order that the others ask you for!!

IT PAYS TO BELONG TO CORNERSTONE, AND IT PAYS TO TELL YOUR FRIENDS!!!

SPY vs SPY — Based on the Mad Magazine series, two opposing spies battle to locate four terrible secrets located somewhere deep within the embassy. Here's a chance to play against a friend or against the computer. Terrific game, featuring superior split screen graphics.

R.R.P. \$29.95(C) \$34.95(D)

OUR SPECIAL PRICE \$28.00(C) \$32.50(D)

SHERLOCK — Sherlock is a terrific graphic / text adventure game based on the famous detective, Sherlock Holmes. The aim is to solve a number of horrible crimes without getting killed yourself. While solving the crimes, expect to run into The Inspector, The Servants, The Police, Dr. Watson and even the dog! A very addictive real-time musical adventure.

R.R.P. \$39.95(C)

OUR SPECIAL PRICE \$37.00(C)

CAULDRON — A spectacular new arcade adventure game that sets new standards in graphic realism. Cauldron combines excellent playability with stunning 3D graphics, providing a fantastic shoot 'em down / adventure type game play. One of the new generation arcade-adventures. This is probably the hottest game of '85

R.R.P. \$19.95(C)

OUR SPECIAL PRICE \$18.50(C)

SLAP SHOT — A great team sports simulation that accurately recreates the elements that make ice hockey such a fast and violent game. A game for two players with a clever bodychecking facility, that includes a "roughing penalty" if it's used too often. Other features such as three levels of play and smooth talking speech synthesis provide plenty of exciting entertainment for every sports fan.

R.R.P. \$24.95(C)

OUR SPECIAL PRICE \$18.50(C)

CASTLE OF TERROR — A superb graphic adventure with forty screens to conquer. On your way to rescue the beautiful maiden you are forced to face terrors that you would never want to dream about. Your setting is a creepy castle in the days of Dracula's reign. This journey should never be taken late at night!

R.R.P. \$24.95(C)

OUR SPECIAL PRICE \$23.00(C)

POLE POSITION — Fantastic!! This genuine reproduction of one of the worlds most popular arcade classics gives you the chance to experience the thrill of Formula One motor racing. Enter the practice sessions, race against the clock to qualify. Dice for the lead with other experienced super-drivers and learn the thrill of the chequered flag. Another chart topper.

R.R.P. \$29.95(C) \$39.95(D)

OUR SPECIAL PRICE \$28.00(C) \$35.00(D)

THE HOBBIT ON DISK — If you thought the graphics were good on the cassette version of this great adventure, wait till you see the graphics on disk!! Now there are no less than 80 locations, and a brand new musical score to accompany the fantastic pictures. The vocabulary is now up to 800 words, and there are lots of new problems to be solved. This is the adventure game by which all others are judged. And you thought the best couldn't be bettered...

R.R.P. \$39.95(D)

OUR SPECIAL PRICE \$37.50(D)

A VIEW TO KILL — At last!! The computer version of the film of the same name. In the movie, James Bond is briefed by "M" to discover what sinister plot is being hatched by Max Zorin, electronics magnate and unscrupulous crook. The top secret agent's travels take him across the world in this nail biting adventure. The computer version is a close adaption of this story, made in close co-operation with the main production team. James Bond theme music accompanies the game and electronic speech thrills and delights players. The fantastic Paris car chase leads to the City Hall fire escape, in which Bond has to find his way through 75 different 3D rooms with the fire closing in around him and time running out. Now you move to the Silicon Valley Mine, where a nuclear bomb is counting down, ready to blow the entire area into the sea. Will Bond beat the clock? Will May Day turn against her evil boss? All this and much, much more awaits you!!!

R.R.P. \$29.95(C)

OUR SPECIAL PRICE \$27.50(C)

THE WAY OF THE EXPLODING FIST — A unique karate simulation full of competitive action. Startlingly realistic graphics, oriental settings, vivid colours, smooth animation and an atmospheric soundtrack incorporating the sounds and cries of the tournament opponents underline the theme of this amazing masterpiece. All the strategies and positions of the ancient art are possible even somersaults. Set to become one of the best selling games this year!!!

R.R.P. \$24.95(C) \$29.95(D)

OUR SPECIAL PRICE \$23.00(C) \$27.50(D)

QUICKDISK 2 — A terrific disk utility for the 1541 disk drive that increases the speed of data transfer by around 400% - 500% even though you may have a second disk drive or printer connected. The program features a menu facility that allows you to transfer the high speed utility to most of your current disks, and then call up your programs by number for automatic loading and running. Quickdisk 2 also includes Disk Trainer, which is a useful utility for checking your drive for correct alignment, and a program that allows you to convert into high speed loaders any programs that have been transferred from tape to disk with DISCO. Quickdisk 2 works on all but the most heavily protected software. All in all, a must for every disk drive owner. After all... why pay more for something that may give you a lot less.

R.R.P. \$34.95(D)

OUR SPECIAL PRICE \$24.95(D)

FASTBACK — Convert those slow old tapes to high speed format. Works on nearly all non-turbo commercial programs, too, including the protected versions.

R.R.P. \$29.95(C)

OUR SPECIAL PRICE \$20.95(C)

DISCO — Got a disk drive now? Disco allows you to automatically transfer most of your old cassette based programs onto disk automatically. Works on nearly all non-turbo commercial programs, too, including the so called protected software!!

R.R.P. \$24.95(C)

OUR SPECIAL PRICE \$20.95(C)

GRAPHICS MASTER — Graphics Master is a sprite and character editor that adds graphics and sprites to your existing programs yet is not needed to re-run them. The program allows you to easily design entirely new character sets, individual characters, hi-res sprites and multicolour sprites. You can save them on tape or disc, and then call them up with a simple four line sub-routine that allows them to be added to your own programs. Graphics Master is great fun and it allows the user to get quickly into the design of custom characters and sprites without having to know what goes on under the bonnet!

R.R.P. \$24.95(C)

OUR SPECIAL PRICE \$16.95(C)

BRUCE LEE — Join forces with this famous marshall arts hero and his trainer. Defend yourself against one challenger after another as you fight your way through twenty secret chambers. Program features dazzling graphics and unique multiple player options.

R.R.P. \$29.95(C) \$39.95(D)

OUR SPECIAL PRICE \$27.50(C) \$35.00(D)
