From the Back Room...

Welcome my friends to the third issue of the Commodore 128/64 Power User newsletter or CPU for short. Last issue's Editorial has generated some response, compelling me to clarify my position on COD orders. Fender Tucker of Loadstar brought to my attention the fact that Softdisk Publishing doesn't do COD and that they are a reputable company. I concur wholeheartedly with Fender! I was trying to make a point; not insinuate that all companies that dont do COD are questionable.

I was referring to mail order businesses in general. Softdisk is not a mail order business, rather it is as its name stipulates; a publisher. They publish magazines albeit on disk, and subscriptions from any publisher is never sold on a COD basis. At least I have not come across one yet that does. Therefore Softdisk Publishing isnt even in the same category as retail and mail order outlets. I have found in my years of dealing with them that they are a company with integrity, and they are not the only ones that are.

Ok, enough of that. Have you noticed the different banner on this issue's cover? When discussing Power User I and others have always referred to it as CPU. Short for the Commodore 128/64 Power User newsletter. So I decided to change the banner to just that; CPU the Commodore 128/64 Power User newsletter.

You will also have noted that the overall layout has been changed. There is now a table of contents page instead of the

"Whats Inside" box on the inside front cover. All vendor advertising is now in the back of the magazine where they are easy to locate. We have added some new columns: Kids Korner, and PD Potpourri. These will be regular additions to CPU. We are also adding what we call features, articles of interest. Each issue will contain from one to three of these.

This will be mentioned in the News Worthy column but I wanted to say it here also. Doug Cotton of CMD posted on GENie that due to the overwhelming response from 128 owners, that CMD is going forward with a Super 128CPU. And because of advanced orders for the Super 64CPU have mostly been for the 20mhz model, CMD has decided to scrap the 10mhz version. Doug also indicated that this will push the release date of the Super 64CPU back to April instead of February. Also the 128 version would follow in about 90 days. I cant wait!

You may have noticed that this is the FALL 1995-WINTER 1996 issue. This is so that CPU falls back into schedule. You will still receive the same amount of issues for your subscription. Your mailing labels will have the documented change.

Support those of us that support you by "Ushering the Commodore User into the 21st. Century".

GEOS TIP... When in a large GeoWrite document, it is quicker using the Goto Page function to move forward even if it is the next page than the keyboard short cut " C= +"

Time is a Tumbleweed

by: R.J. Smulkowski

Hello, Commodore Faithful. It's going to be one of my "good news, bad news" columns...let's get the bad out of the way, OK?

The Library BBS, long the online organ of suburban Tacoma Washington's UPCHUG (University Place Commodore Home Users' Group), has ceased operation. Personal health of the system operator is a major reason behind the closure. This is a sad thing, on many levels. UPCHUG has for years been a power group and a class act. The Library BBS was always a fun, family-oriented board. And Brenda (The Library's sysop for years) is one heck of a lady. So, the Cowboy tips his Stetson for a minute, saying "So long, podner" to a fine Commodore BBS, and sending heartfelt get-well wishes to Brenda.

And now, old friends of the Cowboy might say "Whoa, Cowboy, we've heard this one before", but it bears repeating folks -- if you have a Commodore resource out there that you use, give those folks a bit of support and show your appreciation. The BBSs, user groups, publications, and programmers that speak our language are getting to be precious few.

And now, let's lighten up a bit, eh? Let's talk about something, or rather someone, on the positive side of Commodore usage. Commodore users should all look towards Michigan tonight and say a word or two of thanks. Mr. Maurice Randall just keeps on cranking out exciting software for our beloved little 8-bits. Last summer there was geoFAX...now there's one for you -- sending/receiving FAX transmissions with a C= 64 or 128! And they said it couldn't be done. Just who is this "they", anyway? Not one to rest on his laurels, Maurice's latest project is a top-quality telecommunications program for GEOS 128, one area where GEOS has always been lacking. Sneak peeks at this package, known as "The Wave", have been leaked and the response has been positive. Both geoFAX and The Wave require a bit of hardware exotica, but you are reading "Power User", right?

And while we're in gush mode, let's look towards the wild Pacific Northwest, home of the Power User Newsletter. There are precious few Commodore-specific publications left, and this one is an entirely private venture. Tom does it first and foremost out of love for Commodore 8-bit computing. If and when the Commodore Hall of Fame roster is drafted, I surely hope that the Maurice Randalls and Tom Gossers of the world -- the little guys who do their research and development work in their precious spare time, who finance their 8-bit passions out-of-pocket and not with corporate venture capital -- are not overlooked. Thanks, guys, from the Cowboy.

PEACE

NEWS WORTHY

SUPER 128 CPU announced

CMD announced that there will be a **Super 128 CPU** that will work in both the 64 and 128 modes of that computer. Because of this change the Super 64 CPU will be shipping sometime in May or June instead of February. The reason is to maintain board compatibility between the two versions, thus keeping costs down. CMD indicated that the Super 128 CPU will ship approximately 90 days later. That puts it somewhere around July. CMD is still accepting \$50 deposits on the Super 64 CPU and are now taking \$50 deposits on the Super 128 CPU at this time. Price for the Super 128 CPU, \$299. For more info call: 1-413-525-0023

CPU SUBSCRIPTION CONTEST

GosserGamesLtd., Inc. Publications has announced the first ever **CPU the Commodore 128/64 Power User newsletter** subscription contest. Subscribers have a chance to win a **Super64 CPU**, **CMD SmartTrack** trackball or a **GEOS ScanArt** graphics collection disk. One (1) grand prize will be awarded, three (3) second place prizes awarded and eleven (11) third place prizes. The grand and second place prizes are waiting to be shipped to the winners directly from CMD as soon as the names are drawn on the July 9, 1996 drawing date. Subscriptions or renewals must be postmarked no later than July 1st. The third place prizes will be mailed from GGL, Inc. Publications. *Winners names will be published in CPU, Commodore World and the Loadstar Letter.* For more info call the Power User BBS at 1-360-426-2406 logon as GUEST enter CPU at password prompt and go from there.

C64 8-bit Sound Sampler

Cindy Simms (no company name, so we'll call it **CS Enterprises**) has announced that she is distributing an 8 bit sound sampler for use with **DigiMaster** the C64 sound sampling software from Autumn Technologies. CPU purchased one of these samplers and it works flawlessly. The sound quality is very good. CS Enterprises does ship COD and accepts check or money order. The cost of the sampler is \$60 ppd. CS also offers a kit to separate the C64 keyboard with a 10 foot cable. DigiMaster can be ordered from CMD for \$34.95 see their Ad elsewhere in this issue.

Make check or M.O. payable to:
Cindy Simms

Changes announced at Threshold

Productions

In the past few months quite a few changes have occurred at the TPI offices, of public note are:

Threshold Productions is now known as Threshold Productions International. The extension on the name is for legal reasons, there is another company using the same name which handles graphics and animations for various TV shows.

Our message number has changed, to leave a message just dial 1-(206)/706-2231. The (206)/361-1332 number is now for private/non-business related calls only.

We will be shipping our first catalog very soon and unlike other catalogs it will be disk based with playable preview versions of our titles. When requesting a catalog please include USD \$1 for shipping purposes.

Jonathan Mines / IRC nick Skyclad / Head Manager @ Threshold Productions 17730 15th NE Suite #229 / Seattle, WA 98155
 tpinfo@eskimo.com / (206)/706-2231

The Gatekeeper improves

The Gatekeeper is undergoing many new improvements. Issue 4 (February/March 1996) marks our first issue with a color cover. We also have a more compact size on 8.5" x 14" paper, and with 32 pages we end up with 34 more square inches than on 11" x 17" paper. Issue 5 will be our first issue with a professional illustrator as well as articles submitted by third-parties. In the near future we plan to be laser printing, using bulk-mail, and ultimately to move from photocopying to printing press. To accommodate all of this, our rates have risen slightly. Here are the new prices:

Rates (US funds)	US	Can./Mex.	International
sub (1yr./6 issues)	\$14.95	\$16.95	\$26.95
w/ 3.5" disk	\$23.95	\$26.95	\$36.95
w/ 5.25" disk	\$22.95	\$25.95	\$35.95
sample issue	\$3.95	\$4.50	\$5.50

back issue \$4.95 \$5.50 \$6.50

The companion disk is public domain and can either be received with the newsletter in an envelope for the price indicated, or one may send a self-addressed, stamped disk mailer and formatted disk to get it for free. Besides including all of the public domain and shareware programs mentioned in each respective issue, original and never before released programs and sourcecode are included from our programming columns (assembly language and C). The Gatekeeper, 610 First Street, Liverpool, NY 13088.

Job Opening at Threshold Productions International

Position: Head Programmer
 Hours: Part Time (ten or less hours a week)
 Pay: \$6/hour

You should have good 6510 programming skills. Be able to handle packing/crunching tools and have at least a vague idea about the difference between NTSC and PAL C64s. You will be involved in:

1. Taking already completed games and making preview copies
2. Creating a standardized booting system
3. Stripping trash off completed games and re-packing/crunching
4. General programming tasks

Not all the work is with games - we do have some other software projects at the moment which need some touch ups.

Send all information you think is needed to tpinfo@eskimo.com

Jonathan P. Mines - Head Manager @ Threshold Productions International IRC nickname Skyclad 17730 15th Ave NE Suite #229 (206)/706-2231 tpinfo@eskimo.com

Continued on Page 5

Power Using: IPaint

IPaint; *Interlaced paint program for the Commodore 128*. The fact that the graphics produced with IPaint are interlaced is what makes this paint program for the C-128 stand out from Basic Paint and Masterpaint. Another thing that makes IPaint stand out from the crowd is the plethora of printer drivers and printer support.

A few years ago IPaint lacked in the area of color printer support. Paint programs are really only as good as their hardcopy output. Greyscale output is fine, but when you're dealing with the resolution and color palette of the caliber that IPaint delivers, you want if not need high quality hardcopy. I was fortunate enough those early days to have a STAR NX-1000 Rainbow color printer. I still have it by the way. I had met Rick Kane on Qlink and had been corresponding with him about color printer support. Rick asked me to mail him my printer manual so he could write a color printer driver for the NX-1000 Rainbow. In exchange I got to beta-test the drivers.

When I saw the output for the first time from a color printer I was duelly impressed. It beat greyscale hands down! Having said that, I must admit that even as good as the color printouts were from IPaint, I found them lacking. But I learned to live with it. I discovered that the best printouts came from graphic images that had a lot of bright colors. Images that are dark and have a lot of browns and greens didnt reproduce satisfactorily in printout. So I avoided printing images of this type. One thing about color printing that you soon discover is, it is sloooooow!

Well Rick must've realized that the color printouts were lacking in detail also. So over the next couple of years (I dont know if it actually took this long to write the new drivers) time past! Rick and

I had been contact with each other on GEnie and last year he asked me if I would like to test some new drivers he wrote for IPaint. I jumped at the chance! Actually what happened was I recieved e-mail from Rick asking me if I had finished beta-testing the new color printer drivers, and to report my findings. I had no idea what he was talking about. He had been so busy that he thought that he had uploaded them to me to test. I let him know that he had'nt and that I would be more than happy to test his new drivers.

The problem with a paint program like IPaint having a theoretical 65,536 apparent colors is that there are no color printers with that many colors. So to compensate for this most color printer drivers treat all like colors the same. For example all shades of red within an image would printout as either dark or light red. The same with greens and blues, oranges and browns. So you can see that a graphic that has a lot of color detail is going to lose that detail when printed out.

The ribbon on the NX-1000 Rainbow is a four color ribbon; black, blue, red, and yellow. At first glance it would seem that the printer has a very limited color palette. It is in fact capable of printing in seven different colors. How do you get seven colors out of four? By printing in the same area using two colors. When two colors are mixed you get a third color. Actually the seven available colors are accessed by sending escape codes to the printer, through creative programming however a more extensive palette can be realized. Theoretically you could get twenty-four colors from this ribbon. Still doesnt sound like much? What if you could dither the color to get more shades and varing levels of intensities? How many apparant colors would there be now? If you dithered one color with any one of the

twenty-three other colors than you could get 552 different colors. And what about the varying degrees of brightness?

Well, I am not a mathematician so don't hold me to those numbers. The point that I am trying to make is that by using a dithering technique, Rick Kane has succeeded in creating a color printer driver that reproduces the colors that you see on screen on paper. So if you see an ochre instead of an orange on screen, these new color drivers will print ochre on paper, not orange. The one big drawback of these new drivers is the time it takes to make a printout. About four times longer than the standard color drivers! But the end results are well worth the wait.

These drivers offer landscape and portrait modes as well as several modes of resolution. Your printout can be as small as a few inches or large enough to encompass multiple sheets of printer paper. A black and white dithering mode is also an option for those with monochrome printers wishing a greyscaled printout of their color images.

Any serious IPaint power user will want these next generation color printer drivers for themselves. Please contact: *Living Proof, Ltd., P.O. Box 80714, Mpls., MN., 55408-8714* for availability.

CKit 94!

It's Cool!

CKit 94 is a powerful collection of backup utilities designed to take advantage of the expanded Commodore systems of the 90's. In fact the CKit is so advanced, we recommend it only for certain Commodore systems.

If You Have One Of These
Commodore 64, 64C, 128, or 128D
And One Of These
CMD RAMDisk, PPI RAMDrive, or a 17XX REU with IntvDOS
And At Least One Of These
Commodore 1541, 1571, 1581 or any CMD Storage Device
• YOU NEED THE CKIT 94! •

It's Mean

CKit 94 can view, select, and copy over 1,000 files! It can also copy entire 4171/81 disks in ONE pass. It can even make the next copy directly from RAM. With the CKit you can squeeze over 700 files into an archive. Even more, you can squeeze your 4171/81 disks and CMD partitions into backup files. All of this power is at your command through an easy to use menu driven interface.

File Utilities
Filemaster file copier and the Archiver file-squeezer
Disk Utilities
Precopy disk copier and the 4171/81 Native Boot disk squeezer
BBS Utilities
New Dissolver SDA maker and Fast PD Decompress

It's Better

CKit 94 has 2 X faster and tighter compression than in previous versions. All of the utilities have been enhanced for power and speed. Plus, it has three new powerful utilities. And it takes full advantage of Commodore 128's and REU's. Wow!

Check Out The Support!
/ Commodore 1541-1571-1581 Drives
/ CMD Hard Drives, Floppy Drives, RAMlinks
/ PPI RAMDrives
/ Commodore 128 VDC RAM Support (16K and 64K)
/ Commodore 128 2MHz Enhanced Mode Support
/ Commodore 17XX REU Support (up to 16Mleg)
/ RAMlink and RAMDrive DACC Support (up to 16Mleg)

Get Your Copy Now!

CKit 94 is available at fine Commodore mail order outlets such as Creative Micro Designs. You may also order directly from us.

Enclose Check or Money Order for:
CKit 94 \$39.95 (Update \$9.95) plus
Shipping \$5 US and Canada (\$10 Foreign)

Story Time

White Dragons Mountain

Copyright (c) 1988, 1996 Thomas R Gosser
ALL RIGHTS RESERVED

*NOT SO LONG AGO, IN
A WORLD OF
ANOTHER REALITY.....*

It was warm for a Winter's evening 100 leagues to the southeast in the village of Ot. The sun was just beginning to set over the White Dragons Mountain and the town's taverns and Inns were overflowing with the bustle of people searching for drink and merriment. A smoky haze started to blanket the valley below the mountain where the village sat. Sounds of music and boisterous talk and laughter arose from the valley. The sounds made their way up the mountain, through the crags and peaks, over the plateau's and into the Dragons lair.

The sounds of the humans assaulted his ears. But the Dragon only smiled. He was known as Cryothraxus, and in his cunning heart beat a plan that would soon rid him of these pests once and for all, and also add substantially to his already huge hoard of treasure. Once the village far below has been decimated, he would be exalted by his peers to the point of envy. Had Cryothraxus heard the conversation taking place between two men, one a Dwarf, the other a human, he might not have smiled so self-satisfyingly. For these two men were plotting an end to the great White Dragon and his great hoard!

In a dimly lit corner of the "Why Vern?" tavern sat two men. One a tall spindly fellow with shifty eyes and dark unkempt hair known only as "Fingers" to those having the misfortune of knowing this man personally. Actually Fingers was a good person of sorts. He could be trusted by his closest friends, irregardless of the fact that that was not a high number. He was honest and dependable when it came time for him to perform his thieving abilities.

Fingers companion who sat across the table was one of his few friends. Broad chested, short of stature yet large and forboding. Long thick red locks of braided beard cascaded down his voluminous chest. It was as plain as his

grey eyes to anyone that this man was a Dwarf. A man of iron, of battle and conquest. He was young for a Dwarf, yet his years were equal to any human in their middle ages. Thor was his name, given unto his mother by a minion of Odin.

Thor wears the scars of many battles, but now his heart yearns for adventure and treasure, especially gold. Tonight Thor and Fingers are planning their next adventure. And it involves a certain White Dragon and it's hoard!

Fingers was about to speak when a comely waitress approached their table. She asked, "may I take your order, gentlemen?" Thor was the first to respond, "bring me a leg of lamb and a tankard of ale." "Make that two tankards of ale!", added Fingers. "anything else mister?", asked the girl. "Yes! As a matter of fact there is one more thing —you", replied Fingers with a big smile on his face. Thor just looked at the wench to see her reponse. Both men almost fell out of their seats when the girls response was, "Okay meet me in the alley out back after closing." Both men were dumbfounded, Fingers never had such a positive response before.

So after their meal and getting their fill of ale, the two adventurers exited the tavern. It was late, not much activity in the streets. But that was to be expected of a Village the size of Ot. The two started walking down the foggy street toward the town's stables when Fingers broke the silence. "You go and check our horses Thor, I have a midnight rendezvous, he said. I think ye would be best off old friend if you left that wench to her own devices, snapped Thor. Fingers laughingly responded, "Why I do believe my old Dwarven friend is jealous! Ach, dont be a fool man! Did ye not see that glyph on her cheek? retorted Thor. Aye! So what? questioned the thief. Bye the Gods man have ye no learnen other than thievery? That glyph is the mark of the Telle!

Aha, I think that green ale has given you illusions Thor! Fingers chuckled and asked, what is the Telle? A Coven, an ancient order of very powerful witches. Thought by many to be the creators of the Dragons, answered Thor. I dont believe it. The Dragons of Gondwana were created by the Gods of Chaos during the Apocalypse of the first millenium!, exclaimed Fingers. A great many of this milleniums Sages contend otherwise, mi dear cutpurse. Thor was bored with this confabulation and meant to seek an escape from it. Treasure was on his mind, gold in particular.

It is well known that once a dwarf has gold on his mind it is not unlike an uncontrollable fever. Thor grabbed Fingers by the arm brusquely and jerked him in the

Continued on Pg 7

direction of the stables. Lets go, he said, we canna delay any longer! When the two reached the stables they noticed that the stench was stronger. The stable keeper was shoveling compost into a cart. He was a lanky sort, mid height with a greenish tint to his skin. Any half educated idiot could tell that this man was half Orc. His looks were presentable, a rare specimen indeed. We've come for our horses my good fellow, exclaimed Thor. The stable keeper nodded, Aye I'll be with ye inna shake. Meanwhile way up on the Mountain top, Cyrothraux dreamt of warm humanoid flesh. Was that a grin that parted his lips ever so slightly at the thought?

Next Issue: Part Two

SUPER CPU

Or how I justify the need for this new toy!

When CMD first announced that there was going to be a Super64 CPU released for the Commodore 64 computer, I jumped for joy. They announced that there would be two models available, a 10mhz model and a 20mhz model. I thought forget about the 10mhz one, I want the 20mhz model! The estimated price was \$199.00 for that particular model. I have so much invested in my system now I thought to justify spending an additional \$200 on myself.

I had already made up my mind that I was going to get this new gadget. I really wanted one to work in the 128 mode as I do 99.5% of all of my work in that mode. But CMD did not want to commit to a 128 version if there wasn't going to be enough demand for one. So they started essentially a write-in campaign to glean how much interest there would be in a 128 version. Well, there was a enough interest for CMD to decide to go ahead with a 128 version of the Super CPU. Instead of waiting for the 128 version I sent in my \$50.00 advance for the Super64 CPU. At least I will have it to play with until the Super128 CPU is released.

So, to justify spending some more money on my system I sat down and made a list of things that I do in the 64 mode, or could do until I got my Super128 CPU. If any of you use the software in this list, then you can imagine how any of it would benefit from a 20x speed increase. **FGM**--what a great graphics manipulation program this is. Imagine it running 20x faster! **Games**--like the SSI AD&D role-playing games. No more slow combat sequences! **GEOS**--so bitmap intensive and widely used. Imagine using geoPublish and seeing the page draw out 20x faster in page graphics mode! **Digimaster**--the state-of-the-art sound sampler for the Commodore 64. From sampling to IFF sound file conversion running 20x faster! **Maverick**, **SID Symphony**, **Koala Paint**, **RUN Paint** and numerous utilities. **Handyscanner 64** and the **Video digitizer**, just think what a speed-up of 20x will do for these programs!

And there are many others, **CKIT 94** just to mention one. A 128 version could greatly enhance programs like **Ipaint**, **Iport**, **BASIC 8**, **Master Paint**, **GEOS 128**, **Superbase** and on and on. 128 games like **Quest for Adventure**, **Maidstone Quest** and others. These games are excruciatingly slow in execution even at 2mhz. So as you can see I don't have a problem justifying spending \$200.00 on myself. And when the Super128 CPU is available I won't have a problem then either, only it will be another \$300.00 unless of course CMD has an upgrade policy which they have indicated they do want to offer.

-Tom

CPU's WISH LIST

Just about every computer user has what is called a *wish-list*. Commodore users are no exception, they're the rule. A wish list is a compilation of things hoped for or needed. In this case computer related. So, published here and now is the "Official Power User wish list". You may peruse this list and add or subtract what you may from your own personal *wish list*.

Free-form clip for Ipaint.
Free-form clip for geoPaint.
Handyscanner driver for Ipaint.
Handyscanner driver for geoPaint.
Video digitizer driver for Ipaint.
Video digitizer driver for geoPaint.
128 80 column version of FGM.
Flat bed scanner for the 128 and 64.
Color scanner for the 128 and 64.
CD-ROM for the 128 and 64.
CD-ROM software for the 128 and 64
GEOS 128 80 column desktop
publishing package.
128 versions of all 64 mode only
software.
JPEG and MPEG import ability.
128 80 column games.
GEOS file copier for copying outside of
the GEOS environment.
Commodore World magazine to go
monthly.
Graphics conversion software from any
format to any format.

As you can see there are many things here that most likely will not ever happen. But some will, like FINALLY! the 128 GEOS desktop publishing package from Maurice Randall. There is a CD-ROM interface cable and disk available for the Commodore from Australia. Importing JPEG's into Ipaint maybe a reality in the

near future. Handyscanner and video digitizer drivers for Ipaint and GEOS are distinct possibilities. New 128 80 column games appear sporadically. A flat-bed or full page scanner has been hinted at by developers. In the mean time we have geoFAX to scan in full page artwork into our Commodore's.

Yes the future looks bright and appealing for the 8-bit Commodore user. It looks like we will have new products and support into the next Century. It seems that this dead horse isnt ready to stop kicking just yet.

POWERVERU: IPORT

Do you like the output of IPaint but cant draw or create computer art worthy of viewing? Have you seen all the great graphics and images created by other people and desired to import them into your C128? Well now you can with IPort, the stand alone IPaint graphics management software!

The current 1.54/D version of IPort offers eight *import* options: IFF, KOALA, GIF, MAC, GEOPAINT, BASIC 8, DOODLE and PRINTSHOP; and one *export* option, GIF. These are also called modules. When a conversion is selected the appropriate module is loaded. The eight modules operate similarly on similar actions: Open, View, Save, Disk Command, Exit, etc. Lets take a look at each Module in turn:

IFF v1.5 Converts an Amiga IFF picture file into IPaint format. Supports IFF's up to 8 bitplanes (256 colors); and 6 bitplane EHB (64) and HAM (4096) files. When converting you have the options of changing the image colors and you can start at any point in the IFF image, you may choose to double the Height, Width or both.

KOALA v1.5 Converts a standard Koala Paint image to IPaint. Unfortunately this means uncompressed Koala files. Any files with the "gg." prefix will need to be converted back to original format before IPORT can handle it. I would like to see in a future version of this module the ability to convert compressed Koala's directly to IPaint. Most Koala's

turn out beautiful when converted to the 80 column screen color palette. **TIP...** *IPORT cant find Koala file when file name has blank spaces at the end.* **SOLUTION...** *When typing in name, after last letter CTRL RVS ON SPACE number of spaces after last letter, then RETURN. Also you must type out all of filename.*

GIF Accepts any GIF version, only recognizes features of "GIF87a" however. Also displays GIF signature to show version. Does not support interlaced GIF's, however there is a GIF delacer stand alone program by the Author (Rick Kane), that works very well. It requires a large capacity CMD device to work and is very time consuming, but worth it just to be able to veiw these images on our C128's.

MAC Imports Macpaint (monochrome) images into IPaint. Most Mac's are larger than the 640x400 screen so this module allows you to select the 640x400 pixel area of the Macpaint image that you wish to save to IPaint. To bad it cant save the whole image, IPaint doesnt have the ability to load in larger than screen images. Also it would be nice if the IFF and the GIF modules had this ability.

GEOS Imports a standard geoPaint image into IPaint. This module gives you color editing ability as well as the ability to select the 640x400 pixel area of the image that you wish to save to

SOLUTION in NEXT ISSUE

POWERSVU: IPORT

Continued from page 9

IPaint. Again it would be nice to be able to save the entire image to IPaint instead of just a selected area.

BASIC 8 Imports a Basic 8 image to IPaint, maintaining its original onscreen aspect ratio by doubling the pixels vertically. To load a Basic 8 picture without this doubling just load it directly from within IPaint.

DOODLE Imports a Graphic 1 or Doodle image into IPaint. It can be its original 320x200 size or doubled to 640x400. This module also offers color editing as well as a cut and paste feature.

PRINTSHOP Converts a standard 88x52 pixel PrintShop clip into a monochrome IPaint picture "ip.*" file.

EXPORT: GIF Creates a Graphic Interchange Format (GIF) file from any IPaint file. You must load an IPaint file for conversion. This module gives you the option of viewing the IPaint graphic and *Write GIF*. When you select *Write GIF*, you will be asked to set or accept a value for *Compress Power*. This is a number between 1 and 5. The higher the selected number the more the image is compressed. The more the compression the longer it takes to write the GIF. Irregardless, this is a lengthy process.

IPORT is a very powerful image processing system. It does a fantastic job within the hardware limits of the C128. Beautiful images that used to be out of the

reach of the Commodore user are now within easy grasp. Hopefully future versions of IPORT will allow the importation of JPEG's and MPEG's if this is at all possible. IPORT can be ordered directly from the Author or Creative Micro Designs:

MAVERICK! will not boot-up if you have a printer connected to your system via a Parallel Cable. You must disconnect the cable from the printer.

Need more support? Want to stay in touch with more Commodore Users? No Commodore BBS's in your area? Then you need to call the **POWER USER BBS!**

The POWER USER BBS is the support board for CPU subscribers. Run and maintained by the CPU staff it is your direct connection to **CPU the Commodore 128/64 Power User newsletter**. Also open to the public, PUBBS offers online support to subscribers, a large PD software library, online games and a vast message base system that is part of the Omni-Link Echonet network system of Omni 128 BBS's around the world.

PUBBS is running Omni 128 BBS software on a 4 meg RAMLink, HD40 hard drive and an FD-2000 floppy. PUBBS supports upto 14.4k baud, CG.ANSI and ASCII output. PUBBS also has a direct connection to OmniWorld, the support BBS for Omni 128 Sysops. If you need support call PUBBS at 1-360-426-2406. Logon as "GUEST" password "CPU" if you just want to browse around.

LOADSTAR® MONTHLY

GEOS Clipart

LOADSTAR presents the biggest Geos collection of clip art and fonts ever offered at one time. All of the Geos art that's ever appeared on LOADSTAR, as well as some great files from Geos fanatic Dick Estel, are available on twenty 5.25 inch disks or eight 3.5 inch disks. Most of this has never been seen before! Use these graphics in your GeoPaint, GeoWrite and GeoPublish documents or convert to FGM with FGM utilities. Spill up your GeoFAX documents with the appropriate graphic - every time! Prices are \$20 for any two 3.5 inch disks, or any five 5.25 inch disks. You can purchase the whole collection for \$75 for either version. Call LOADSTAR toll-free at 1-800-594-3370 or 1-318-221-8718 to order by credit card. Or send check or money order and specify (by LG number) which disks you want.

5.25-INCH DISKS

Disk 01 - RAILS: Railroad art from Europe and the USA #0012D5

Disk 02 - VEHICLES/TAROT: Artwork of old and new autos; excellent geoPaint drawings of the Tarot card set #0013D5

Disk 03 - CLIP ART: Includes converted MacPaint files that have never before been available in Commodore format #0014D5

Disk 04 - OTTOWA/PRIME CLIPS: Artwork of the main landmarks of Ottawa; plus high quality public domain clip art #0015D5

Disk 05 - FONTS: More than 30 fonts from past issues of LOADSTAR, plus articles (in geoWrite format) on creating fonts. Also two ready-made headers for use with your own documents, one a picture of a mail truck; the other reading FROM THE DESK OF #0016D5

Disk 06, Disk 07, and Disk 08 - geoPaint and Photo Album files with the great clip artwork featured on past LOADSTARS - Includes GeoCurmudgeon, Anamallia I and II, Australian Animals, Valentine art and many more #0017D5, #0018D5, #0019D5

Disk 09 - GOODYKOONTZ FILES - Jasper Goodykoontz, born in Indiana in 1855, produced Goodykoontz's Perpetual Calendar and General Reference Manual (A Book for the Millions). This disk includes scans from the book of a wide array of subjects - Gestures and Attitudes, Poultry, Cranology, and more. #0020D5

Disk 10 - OLD WEST: Scanned Artwork from Dick Estel's FRD Software - mostly neat and style art of the old west, gold rush days and pioneer scenes. #0021D5

Disk 11: J. N. O. O. L. Y.

Art/Animals:

Janiffer Neely works with a wide variety of subject matter and materials. Disk contains some of her favorites, scanned into geoPaint format. Side 2 is a collection of scanned artwork of animals from FRD Software #0022D5

Disk 12 - HOLIDAY: Artwork for New Years, Valentine's, St. Patrick's Day, Halloween, Thanksgiving and Christmas #0023D5

Disk 13 - PEOPLE/FACES: Scenes of people and faces from FRD Software #0024D5

Disk 14 - FRD CLASSICS: Dick's choice of the best of the FRD collection #0025D5

Disk 15 - DINOS/CLASSICS: Dinosaurs and other prehistoric beasts, as well as more first choice artwork from FRD. #0026D5

Disk 16 - SPORTS/MISC: Dozens of sports-related clips #0027D5

Disk 17 - OFFICE AND SCHOOL: Clips to be used at work and around the house #0028D5

Disk 18 - MUSIC & MORE SCHOOL CLIPS #0029D5

Disk 19 - SEASONAL AND HOLIDAYS: A clip for any occasion #0030D5

Disk 20 - SEASONAL AND HOLIDAYS: A clip for any occasion #0031D5

3.5 INCH DISKS

The 3.5 disks are roughly equivalent to two and a half 5.25" disks.

Disk 1: Equals disks 1, 2, 4B #0009D3

Disk 2: Equals disks 3, 6, 7A #0010D3

Disk 3: Equals disks 5, 8, 7B #0011D3

Disk 4: Equals 9, 10, 11A #0012D3

Disk 5: Equals 12, 13, 11B #0013D3

Disk 6: Equivalent of Disks 14, 15 and some bonus files not on 5.25" disks #0014D3

Disk 7: Sports, Office and school, Music #0015D3

Disk 8: Music, Holiday and Seasonal #0016D3

For your convenience, GeoVIEW is included on each volume. GeoV 2.0 is suggested.

NEW Games Disk! The Compleat Jon: 11 Games! The

whole gamut of gaming is covered here: artificial intelligence, role-playing, mazes, fantasy, science fiction, education and even non-violence (which was a radical concept in its time). These eleven games are among the best ever published on LOADSTAR. Listed on the menu in chronological order, so you can see how Jon's style changed as the years rolled by. 1581 disk #0021D3 \$20. 1541 disk #0038D5 \$20

NEW Puzzle Disk!

The Compleat Crossword: Every crossword puzzle published in Puzzle Page in one huge collection! 220 puzzles! It uses Barbara Schmitz's CRUCIVERBALIST program to present the puzzles and allows you to "mark" a puzzle when it's solved so that you know which you've solved and which you haven't yet. Each 1541 disk contains 110 puzzles. 1581 Disk #0020D3 \$20. Disk 1 (1541) #0036D5 \$10. Disk 2 (1541) #0037D5 \$10

NEW C-128 Productivity! The Compleat Lee O: Six of Lee O. Clinton's best serious programs for the C-128 80-column mode. Finance, auto expense, kitchen helper, genealogy, resume writing, mutual funds! One 1541 disk #0032D5. One 1581 disk #0017D3 \$10.00

NEW Word Search! Super Star Search 1: 200 original word search puzzles by Steven Thomas and Art Dufley, presented by John Saradino's modern point and click program. One 1541 disk #0011D5 One 1581 disk #0005D3 \$20.00

NEW Story Disk! The Compleat Proquest #95: NEW!!! A 1541 disk with all of the entries in the 1985 short story writing contest on it, including the three grand winners. One 1541 disk #0035D5 One 1581 disk #0018D3 \$5.00

Soft Wear! LOADSTAR T-Shirts: Limited edition Fruit Of The Loom T-shirts. LOADSTAR's nemesis, Knees Caution, stands up to regular washing and drying. Where else can you find Commodore apparel? 50% Cotton/Polyester. \$15.00 each with free shipping! Small #9602D5, Medium #9601D5, Large #9602D5, X-Large #9603D5, XXL #9604D5

Tools! Tutorials! The Compleat Programmer:

Best seller! Over Two megabytes of knowledge crammed and stuffed onto eight 5.25-inch disks or two 1581 disks! Plus tools, extensions, languages, assemblers, tutorials and utilities! 5.25 set #0005D5. 3.5-inch disk #0005D3. For \$5 more, get C= Hacking MAG #0006D3 (on 3.5-inch disks only and NOT available separately) to complete your programming set. \$20.00

PS Graphics! Compleat PS Vol. 1

(The Print Shop by Brotherbund or Printmaster required). Over 1300 articles and never before published PRINT SHOP images. Scan through the many PRINT SHOP images sequentially, by name, or by group number. Press a key and save the graphic you want in 2-block, 3-block and even PRINTMASTER graphic files! All that plus a printed guide! Each volume is \$20.00. Vol. 1: C-64/128 3.5-inch disk item #0001D3. 5.25-inch disks item #0009D5. Vol. 2 (graphics from past LS issues): C-64/128 3.5-inch disk item #0002D3. 5.25-inch disks item #0010D5.

Disks! Card Games! The Compleat Maurice: A compilation of 26 solitaire card games written by Maurice Jones, the acknowledged master of card game simulations for the C-64/128. There's even a brand new, never before published game called Boomerang. Two 5.25 inch disks #0007D5 or one 3.5 inch disk #0007D3. \$20.00 postage paid!

Oodles Of Stunning Art! Tutorials! The Compleat Walt:

During LOADSTAR's first ten years we have published 24 of Walt Hamed's slideshows and multimedia events. Now we've gathered them into one huge collection: seven 5.25 inch disks or three 3.5 inch disks! There are over 250 pictures, including some that have never been published. The greatest one-man collection of art on any computer platform. 5.25-inch disks order #070423 3.5-inch disks order #070423. \$20.00 postage paid!

 For the Commodore 64/128 in 64 mode

ESCAPE ROUTE

THE ADVENTURES OF ERIC HAWTHORNE, P.I.

The Apex Detective Agency has been assigned the case of recovering the rare Acme diamond, which has been stolen by the infamous Ice Lady! The chief has assigned you, Eric Hawthorne, to cover the case! You have just three weeks to recover the gem! A new game for the Commodore 64, Escape Route is a combination of the B movies genres of the 50s and 60s. There are elements of detective, comedy, horror, and Ninja movies woven throughout the game. The game is a combination of arcade, strategy, and board games. Numerous multicolor bitmaps are used throughout. This game will make a great addition to your Commodore 64 library!

ISLAND OF THE DRAGONS

Island of the Dragons is a new action/adventure/role playing game for the Commodore 64. Hi-res multicolor graphics give the program an Amiga-like look. The game plays as an interactive novel or movie with a plot that unfolds as you play. Your plane crashes on an island that is inhabited and ruled by dragons! You will learn the secret origins of these beasts and their link with the prehistoric past. You must rescue your girlfriend who has been captured by evil forces, and you will befriend the gold dragons who will help you on your quest. Explore caverns and battle prehistoric creatures as you attempt to locate your girlfriend and learn the secrets of the island. Great graphics and a unique storyline helps make this new game a must for your Commodore 64 library

Send check or money order for \$19.95 for each game to:

Mash the Maniac in CONFUSING QUEST 2 1/2

.... I don't think so.

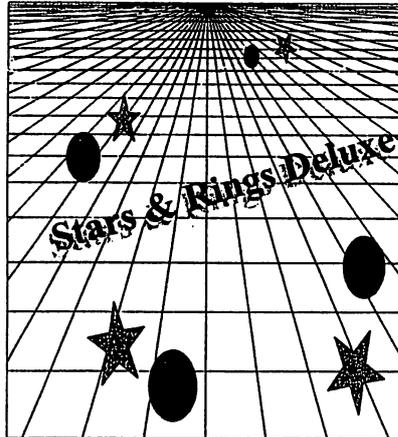

'Still shivering from the first quest, Mash now has a new big task and that is to get his only son from the so-called 'death-planet' Fearth. He starts his mission in a hot-air balloon and will journey through Xanada, Razil, United KnellDom, E-Gibbet, Tusslia and finally Austerelia. With many bloody killings he must fight his way through big and bad monsters and find his only son Junior.

Remember CONFUSING QUEST? This game got a 80% rating from the magazine Commodore Cracker and the good old Commodore Diskette from Parallel Logic. Now we offer you CONFUSING QUEST 2 1/2 and this quest is even better than the previous one! More blood, more fights, more thinking, more tasks, more fun and of course more confusing! CONFUSING QUEST 2 1/2 is a must when you love the superb CREATURES games. More confusing and more fun!

All rights reserved. A game by Peter Staaks

Here we are with the most addictive game ever made on the great Commodore 64! Haven't you ever seen the great Public Domain games STARS AND RINGS 1, 2 and 3?? STARS AND RINGS 1 was recommended by Commodore Format and even appeared on their famous covertape! STARS AND RINGS 3 even received a 100%(!!!) rating from the Australian diskmagazine *The Big Mouth!* Now we release STARS AND RINGS DELUXE and this is the first commercial release from this superb series! What is the difference from his previous versions? Now you control two stars in two playing areas. All this is more addictive and you can even practise each level! Also more bonus stages and everything is ORIGINAL.

To ensure you for another late night behind your C64 screen you must get this addictive game, STARS AND RINGS DELUXE. The stars are in your hands.....!

JiffyDOS

Increase Speed Up to 1500% while retaining 100% compatibility

- Speeds up Loading, Saving, Verifying, Formatting and Reading/ Writing of Program, Sequential, User and Relative files until cartridges which only speed up Loading and Saving of PRG files
- Built-in DOS Wedge plus 17 additional features including file copier, text dump, printer toggle, and redefine function keys make using your computer easier and more convenient
- ROM upgrade installs easily into most computers and disk drives. Supports C-64, 64C, SX-64, C-128, 128-D, 1541, 1541C, 1541-II, 1571, 1581 and more.

FD Series

1.6 MB 3.5" Floppy Drives

The FD-2000 disk drive utilizes today's latest 3.5 inch disk drive technology. FD-2000's support 800K (1581 style) and 1.6 MB (High Density) formats. Fast and reliable, they support 1541, 1571 and 1581 style partitions, Native Mode partitioning and can actually read and write 1581 disks. FD's feature built-in JiffyDOS, SWAP button and optional Real Time Clock. High capacity, speed and compatibility make the FD right for every application, including GEOS.

RAMLink

Power-Backed Expandable REU

The fastest possible form of storage, RAMLink provides instant access to files and retains data while your computer is turned off. Easy to use and expandable up to 16 MB, RAMLink utilizes the same powerful operating system found in CMD Hard Drives. Unlike Commodore REU's which are compatible with less than 1% of commercial software, RAMLink supports more than 80% of the commercial titles. RAMLink also offers built-in JiffyDOS Kernel, SWAP feature, reset button, enable/disable switch, pass-thru and RAMPort for REU/GEORAM use. RAMLink offers maximum speed, expandability and compatibility with all types of software and hardware including GEOS.

HD Series

geoCanvas 64 and 128 !!

80 column color for GEOS !

geoCanvas 128 3.0 supports color in 80 column mode on any Commodore 128 computer, whether it has 14K or 64K of video memory! GC129 lets you work in three different modes (unless advantage of available memory): 14K mono mode - 200 lines high, no color (like geoPrint, good for 14K systems); 14K color mode - 178 lines high, full color (even better if you have 148K); 64K color mode - 200 lines high, full color (The best yet! Requires a 148K video chip)

geoCanvas 64.3.0 is also available, operating in 40 column mode on GS0264 or GS0128. Both versions: Dynamic text resolution - Add and delete text as well. Add 30 text at once! Any marker can write a tool for GC64 or GC128. Programming menus under each tool. Ruler has markings for lining up objects. Edit tool can select entire window and can change color of regions. Paint brush can have or lose effect. Window nears bottom corner of screen so window can be 80% of screen. Multiple copy new box. Preview document once 100% faster than previous version. Ordinate have new features and maintenance also. All settings are remembered from one session to the next. Add much more than can be listed here!

R. Gosner - "GC128 is VERY impressive!"
G. Dwyer - "I think you have a real winner here. I have never enjoyed GEOS 128 like this before!! This is absolutely the best thing ever for GEOS 128!"
GC64 works in 40-column mode and requires a REU and GS0264 or GS0128.
GC128 works in 80 column mode and requires a REU and GS0264 (has all same features as GC64), a demonstration version is available, order below.

Now comes with new text tool!

GEOS Utilities Disk

ALL PROGRAMS NOW WORK IN 40 AND 80 COLUMN MODES!

- AutoAlert** - See when you boot up.
- BlankOut** - Saves screen from burn-in.
- Chaos** - Nice example of nature's random beauty.
- DeleteEFF** - Remove corrupted loaders, formats, and pages from geoWrite disks.
- DirPrint** - Print directory of any disk type.
- DirSAM** - Display Block Allocation Map of any disk type.
- DataProtect** - Make your disks protected as Master or Boot disks.
- ExpTime** - Set a count-down clock.
- FilePrint** - Stamp names while you load GEOS.
- FileLock** - Lock documents with a password.
- FileFile** - Find any file on any disk, very useful.
- HeaderEditor** - Edit header information of any file.
- LockScreen** - Lock screen with password while you're away from the keyboard.
- LogIn** - Password entry each time you boot GEOS.
- NewPlayer** - Makes mouse pointer look realistic.
- NewStyle** - Replaces GEOS fonts (see with soft reboot program).
- NoPictures** - A program that combines and splits geoWrite documents, even those containing graphics.
- Particle** - Open and rename CMD HD partitions from a Desk Assembly.
- PhotoConvert** - Removes resolution boxes from COMVERT.3.
- PhotoPrint** - Prints photo albums to printer.
- RAMTest** - Tests REU for defects in memory.
- Reformat** - Attempts to fix damaged directories.
- ScreenWrite** - Saves geoPrinted addresses onto a REU for reboot.
- ScreenGrab** - Makes photo scraps of any screen, with color support.
- SpillInfo** - Displays information about your system.
- UnbindGEOS** - Removes GEOS from a disk to make it Commodore again.
- geoPrint** - Displays resolution in hexadecimal and ASCII.

COMPUTE's Gazette, on the earlier version: "It's not the next big thing, by any means. It's a whole lot of neat little things... All in all, Fiedler has filled this disk with quite an impressive variety of utilities."

Also available is the Frog Disk, which contains source code for routines written in the geoProgrammer format and usable in just about any program you might be writing. There are 32-bit math routines, and some of the Apple GEOS routines (made for use on Commodore). It also contains about eleven geoWrite documents on various subjects such as geoPrint document format, unlinked routines for GEOS 128 and disk drivers, and other files that were available on Quantum-Link.

SUBSCRIBE OR RENEW NOW AND WIN BIG!

the Commodore 128/64 Power User newsletter presents its first ever subscription contest.

Unleashing the Commodore User into the 21st Century

GRAND PRIZE
3 SECOND PLACE PRIZES
11 THIRD PLACE PRIZES

CMD SUPER 64 CPU
CMD SMARTTRACK Trackball
GEOS ScanART vol. 1 disk

CPU
P.O. BOX 1817
Shelton, WA.
98584

6 Issue Subscription:
 United States \$15
 Can. and Mex. \$21
 Other Foreign \$27

Back Issues:
 Back issues are available for \$3.50 each. This price includes shipping to U.S., Canada and Mexico. Foreign addresses add \$2.00 per issue.

The Commodore 128/64 Power User newsletter (CPU) is currently a quarterly publication aimed at providing timely and upto date information to any level of Commodore user. We bring you informative and interesting articles on how to get the most out of your machine and software. Software and hardware reviews from a users perspective. Find out about rare and powerful software that you probably didn't know existed. And of course, what would a publication be without coverage of the Internet and telecommunications. The *Cyberspace Cowboy* (R. Smulkowski) covers this area in every issue! News, Reviews, Power Using articles, Hints, Tips and much more in our ever expanding coverage of the Commodore 8-bit scene! And now, if you've been hesitant in the past to try CPU, you have the chance to get even more for your money: Subscribe (or renew your subscription) by July 1, 1996, and be automatically entered in our Fabulous Subscription Sweepstakes, you could win a CMD Super64 CPU, CMD SmartTrack Trackball, or a GEOS ScanART graphics collection disk from CMD Inc. Publications! Winners names will be announced in the *Loadstar Letter*, the *Summer 1996 CPU*, and *Commodore World* magazine. The Grand and Second place prizes will be mailed directly from CMD to the winners. Please include a daytime phone number with your subscription order. Winners will be notified by voice or mail if no phone number is given. Prizes will be shipped the second week of July 1996. *Send checks or M.O. made payable to: CPU, P.O. BOX 1817, SHELTON, WA. 98584* All funds must be in US dollars. For info, call our BBS and log on as GUEST, password CPU at 1-360-326-4400 or by voice at 1-360-326-0750. CPU reserves the right to substitute prizes if lack of availability warrants.

Sweepstakes

For more than two years, Commodore World has empowered C-64/128 users by providing the latest news and information on the world of Commodore computing. Through our staff of leading experts like Jim Butterfield, Maurice Randall, and Gaeleyn Moranec, we keep you in touch with new technologies and further explore those features which have made the Commodore great! So, subscribe or renew today for your chance to win big in Commodore World's Sweepstakes '96.

Call 1-800-638-3263
and subscription or renew now!

The Commodore C-65, also known as the C-64DX, was Commodore Engineering's greatest 8-bit achievement, but the project was cancelled before the machine was fully debugged. However, Commodore did create about 200 'Alpha' units, early versions of the computer which were to be sent to developers for testing. If you're our lucky Grand Prize winner, you can own one of these rare pieces of Commodore history—for the price of subscribing!

Grand Prize:

Your choice of:

a Commodore C-65 computer
or 1 MB Super CPU

(2) Second Place Prizes:

Super CPU Accelerator

(12) Third Place Prizes:

\$10. CMD Gift Certificates

Contest valid on new subscriptions or renewals. Must be received by September 30, 1996 to be eligible for the sweepstakes. Winners announced in CW Issue 18. Contact CMD for complete rules.

Please begin my subscription to Commodore World as soon as possible, and enter me in the sweepstakes!

Subscriber Information

Name: _____
Address: _____
City: _____ State/Prov. _____ ZIP/PC: _____
Country: _____ Phone: () _____

One Year Subscription (Eight Issues)
