

The Commodore 128/64

FREE

# POWER USER

NEWSLETTER

**FALL 1994**

**On the Cover:**

In celebration of the 25<sup>th</sup> Anniversary of the Apollo 11 moon landing, the astronaut is Buzz Aldrin, the second human being to set foot upon another world; July 20<sup>th</sup> 1969. This image was scanned from a NASA photo taken by fellow astronaut Neil Armstrong, the first man on the moon, using the *HandyScanner 64* and converted to geoPaint format using *Handy Import*. It was then made into a paint scrap using *Scrap Can* from Nate Fiedler, available with *geoCanvas 64* or 128 versions. Then the scrap was pasted into the geoPublish document used for the cover.

**Whats Inside:**

We have an introductory welcome editorial, a look at geoCanvas 128 v3.0, a look at the HandyScanner 64 and its use, several computing tips placed throughout the issue, a look at who is still supporting the Commodore 8-bit community, several Ads from those that are still supporting us, a column called *Story Time* which has nothing whatsoever to do with computers. It is here as a break time respite. The stories take place in the fantasy world of the *Gondwanaland Frontiers*<sup>tm</sup>.

Here are the names of some of magazines that are still supporting the Commodore user:

Commodore World, Loadstar 64, Loadstar 128, Diehard, Cee-64 Alive!, the Underground, TC128/64(although very sporadic, averaging about two issues a year seems to be going down hill while all the others are growing.) Gazette is gone for now but hopefully some of the things that made it worthwhile will find its way into one of these other publications. These are all that I am familiar with right now, if you know of anymore please let us know.

## From the Back Room...

One year later....

Welcome to the premiere issue of *the Commodore 128/64 Power User newsletter!* The prime focus of Power User is to help you get the most out of your Commodore 128 or 64, and all of the great peripherals that are available for them!

Boy are Commodore user's experiencing a renaissance in computing specific literature today! The old timer's that have left us are being replaced by a new generation of publications. Publications such as the one you are holding in your hands right now; CMD's Commodore World magazine, Diehard, Twin Cities 128/64, Cee-64 Alive!, COIN, the UnderGround newsletter, Gazette disk magazine monthly, C= Hacking and others that I have no doubt missed. The old standbys like Loadstar 64 monthly and Loadstar 128 quarterly are still with us, pumping out quality programs and articles every month.

So as you can see, there is still a lot of support out there for us. There are still programmers cranking out new software, be it GEOS related or game related or what have you. If you wish continued support for your computer then you must support those that support us. But I relent, lets move on.

Well it has been over a year since the inception of Power User magazine, for those of you who do not know. In other words I am that far behind schedule! A few changes have been made to the format, the price and the name. It is now as you can see called the *Commodore 128/64 Power User newsletter*. I was tossing around the idea of a disk based magazine to cut down on costs and time but then Gazette announced that it was going to cease publication and go totally disk based. I feel that advertisers and readers need a printed media to communicate. So for now it is so and in a newsletter format. Power User will still be targeted at the intermediate to advanced C=128/64 user, however even the novice will benefit from it. We will still provide advertising space to the companies that still support us. So Power User also doubles as a resource to keep the Commodore market functional.

Power User will accept and publish Classified Ads

for subscribers selling Commodore related merchandise only, free of charge. This is a service to you as a subscriber. User's groups are also encouraged to send your info for publication. Power User and GosserGamesLtd., Inc. Publications cannot be held responsible for any damage either express or implied through the use of Classified Ads.

Businesses wishing to advertise may send a copy of their Ad. First publication of Ad is free for one issue, after that a small fee will be assessed to be determined at a later date. These fee's will help to offset the cost of publication of the Power User newsletter.

Authors wishing to contribute articles and tips, and advertisers should send all correspondence to the Editor, Class Ads and subscriptions should be sent to:

POWER USER  
P.O. BOX 1817  
Shelton, WA 98584  
USA

Subscription rates are \$15 for 6 (six) issues U.S. only!

Foreign rates are \$22 for 6 (six) issues.

Checks and money orders are acceptable methods of payments in U.S. funds only!

Please allow up to 4 (four) weeks for your first issue to arrive, although it will be a much shorter wait than that. All articles are Copyright (c) 1993/94 GosserGamesLtd., Inc. unless otherwise noted. Power User is produced on a Commodore 128D, CMD FD-4000, HD-40, 8 meg RamLink and Epson Action Laser 1000 printer with EpsonScript Level 2 Cartridge, using GEOS 128 2.0, GateWay 128, GeoWrite, GeoPublish, geoCanvas, Video digitizer from Scantronik and the Handyscanner 64. Copies are made on a Ricoh Copier.

ENJOY!!

P.S. This first issue will concentrate mostly on the companies and individuals that are still supporting the Commodore market. Since this issue is basically a handout issue some people might be seeing an advertiser for the very first time. So expect to see a lot of Ads, names and addresses within in these pages. And by all means if you

*Cont'd from the Back Room:*

know someone who has a Commodore computer then feel free to show this to them.

Thomas R Gosser

**POWER USING:**  
**geoCANVAS 128**

You know paint programs come and paint programs go, but the most endearing quality of geoPaint is the fact that it runs under the GEOS environment. What that means to a computer artist is that you have at your disposal the ability to use all of the various printers and input devices that GEOS supports. Geopaint for the 128 has always provided a few improvements over it's 40 column counterpart. Such as increased speed and higher resolution, you can see the whole page width. One thing that running geoPaint in 80 columns lacks is color. Until now that is, with the advent of **geoCanvas 128 v3.0** full color in 80 columns is supported!

**Nate Fiedler** the author of geoCanvas, has really outdone himself with the release of geoCanvas 128. At first it was a project that He had abandoned after starting it but eventually came back to it. I for one am glad he did! I had the privilage of beta-testing geoCanvas 128 3.0 and the 64 version for Nate and can attest to the fact that these are pretty solid programs. So what does geoCanvas have to offer over geoPaint your asking? Well read on my friend and become enlightened!

To me the full color support in 80 columns is the biggest boon, but there are several other advantages that geoCanvas offers over geoPaint. First off you must have an REU or other RAM device that geoCanvas can use. *For without one you cannot run geoCanvas!* Multiple documents, geoCanvas can have up to three (3) documents opened at the same time. Of course only one (1) is active at any given moment. This allows you to switch back and forth and paste photo scraps between the opened documents without closing and reopening them. Which brings us to another feature, windows. The geoCanvas window is

resizable and relocatable anywhere on the screen and there can be up to three (3). To make an opened document the active one all you have to do is click on its window and geoCanvas will put it in front of the other windows making it the currently active one.

The geocanvas tool box is modular. Which means you add the tools that you want to have in your tool box. You can delete tools or add new ones as your needs change. The modular concept allows programmers to easily design their own tools for inclusion in the tool box.

On the subject of tools, geocanvas does not allow for the pasting of text scraps into your paint document. A feature that I use frequently in geopaint. Hopefully this will be changing soon.

Writing text in geocanvas has been improved over geopaint. Geocanvas has a larger font buffer, thus allowing the use of larger point size fonts. The text can be moved and edited easily with geocanvas' improved tools.

Other tool improvements include the ability to measure with the measuring tool and leave tick marks at two points. The benefits of this allow more accurate alignments. More patterns have been added. A higher resolution preview function, you choose the threshold value! There are other tool improvements but the biggest advantage to purchasing geocanvas is the addition of some applications that are not even part of the geocanvas program. These are seperate unto themselves and only require GEOS to run.

The first and greatest is **ScrapCan**. ScrapCan allows you to cut and paste full size paint documents. Yes you can make a photo scrap out of a full size page. And you can paste these into a photo album if you wish. ScrapCan allows you to access all three drives if need be.

**PaintCan** allows you to change your paint documents created with geopaint so that when you double click on that file geocanvas will load it up instead of geopaint. The file is still geopaint compatible.

**FontCan** will add the delete character to a font, thus allowing it to work with geocanvas.

This overview, *not review* has touched upon some of the features of **geoCanvas** but is by no means complete. If you are into graphics with GEOS be it 128 or 64 there is a geocanvas version for you. And at \$28 it is a real bargain for a high quality program like geocanvas. **geoCanvas 128 is VERY impressive!** But dont take my word for it check it out for yourself. **geoCanvas** can be ordered from: **Nathan Fiedler, 5711 Mt. Pleasant Road, Bernville, PA. 19506**

*GEOS TIP-Gateway will not make  
SubDir on HD- use FCOPY+ to do  
this!*

# Story Time

## TRIAL AND ERROR

Copyright (c) 1991,1994 Thomas R Gosser

ALL RIGHTS RESERVED

*In the land of Nod, the Barbarian Kingdoms which lie about 100 leagues northwest of the town of Ot, there dwelt a man by the name of Samson. Samson was the son of Iquarted the Defiant. Sole heir to the Barbarian Kingdoms of Nod.*

*Samson's interests did not abound in the rulership of the clans. He wanted adventure, and to see the rest of the land around the Kingdoms! Legend has it that he was as mighty as a Hill giant, and as bold as a Minotaur.*

*Now it came to pass that during the season of the Worgs that the clans gathered there mightiest warriors to combat this plague of devastation that always led to substantial casualties among the clans. Samson was of course the first to volunteer to help fight off the Worgs. But as in times past his father the King, forbade him to put his life in danger.*

*This time however Samson set off on his own to stop the annual attacks of these vicious creatures. Samson knew that the Worgs would be following the semi-dry bed of the Pi'son river. What water there was flowing was covered by ice and snow from the previous nights storm. It was cold, and the air bit bitterly at Samson's beard covered cheeks. His breath steamed forth out of his cavernous chest and trailed behind him as he made his way down the riverbed.*

*So it happened that a few leagues down the river Samson came to an area where the riverbed dropped at an noticeable angle and great stones jutted out of the ice. Steep fragile walls climbed higher to the sky the farther he went down stream. Samson began to realize that he could rid the clans once and for all of this annual menace to His people.*

*Searching around for the right spot he soon found what he was looking for, a stone balancing precariously on a pinnacle just above some narrows in the river. "The Gods are smiling upon me thus far", he breathed to himself as he started ascending the stone wall. He was glad he had pursued climbing as a recreational choice as a youth. He knew it would come in handy someday. He had lost his older brother to the sport when they were but children, and that is why his father is so protective.*

*Darkness came quickly and he knew he would not make it to the top before all sunlight was gone. As luck would have it he found a ledge on which to spend the night, but there was an unwilling resident that did not want to share its perch! The hideous beast screeched at Samson from its nest but did not attack. Samson peered at it from over the ledge, he could tell that it was a Pteranodon, a large bat-like reptile with a razor sharp beak, the likes of which have been known to carry off unattended children.*

*As He moved ever closer to the the nest of the avian lizard the beast became more aggressive and agitated. Suddenly it leapt into the empty air and went into a dive and then banked hard right around the pinnacle of rock. Once it reached the base and just before colliding with the ground it pulled back and the momentum of it's decent sent it on a trajectory that shot the creature straight up the side of the rock pinnacle toward the back of Samson. With wings swept back to decrease drag and razor sharp talons poised for prey just inches from the rock wall the Pteranodon arced over the ledge and raked it's talons in a backward motion at it's target, but the target was no longer there!*

*As soon as the reptilian avian caught sight of its prey a blade of cold sharpe steel fell across it's neck, severing the head cleanly and completely from the rest of the body. As it did so the body of the beast rolled violently into Samson knocking him off balance; the sword fell and so did Samson, over the edge ....*

To be Continued

# *Power Using: Handyscanner 64*

The Handyscanner 64 is a unique innovation when it comes to Commodore peripherals. It lets you scan in printed text or artwork from a variety of sources into the computer, that can then be manipulated with the enclosed software. Or you can convert the images to Geopaint format and really have a powerful means of graphics manipulation at your disposal.

If you want to manipulate the image even further then you can use the Fun Graphics Machine, available from the FGM Connection to grab the converted Geopaint image. Then alteration is just a matter of procedure.

The Handyscanner 64 comes from Germany and is imported by Parsec, Inc. and RIO Datel computers. The scanner proper is just a standard IBM compatible type scanner. In fact it will work on an IBM and Amiga type computers. So knowing this and knowing that the little connector at the end of the cord is the same as the 4.13 inch scanners that you can get for the aforementioned computers. I deduced that a 4.13 inch scanner would plug into the interface that comes with the Handyscanner 64.

The only real unknown at this point was how the software would react to a scan window 4.13 inches wide as compared 2.5 inches wide. What happened was this; the righthand side of the image overlapped the lefthand side of the scanned image on the screen. But the over all scanned area was still larger than the handyscanner's. The screen is still the same size, what happens is there is more image in the same amount of area so the subject size is actually smaller. With some minute editing an acceptable graphic can be had while using a large window scanner.

As with anything of this nature, a lot of experimentation is necessary in order to achieve

satisfying results. I am currently red faced, I found out after having started this article that the Handyscanner 64 was being shipped with the four inch scanner engine now. The smaller scanner was apparently discontinued.

But it is good to know that there is a replacement for the scanner engine. And with some of the compatible scanners falling way below the \$100.00 mark, it makes it more affordable to replace. The handscanner is a great product. It really enhances the Commodore 8 bit computers. I would like to see more software that supports it. Directly scanning into geopaint would be a great boon. I understand that **FINALLY!** by Maurice Randall will have a handyscanner driver. At least that is what Maurice told me.

At the time of this writing no one in the USA distributes the Handyscanner 64 anymore. Creative Micro Designs has indicated that they may become a US distributor. Also the handyscanner may becoming obsolete as you read this. Maurice Randall, that ever prolific GEOS programmer has announced the release of **GeoFax**. With *GeoFax* and a Fax machine Maurice proports that you will have the ability to *scan in a full page* at a time into GEOS! *Most impressive indeed!* I for one cant wait to get my copy of *GeoFax*.

**GeoFax** should be available by the time you read this and can be ordered from CMD or Maurice directly. To order from Maurice send \$39.95+\$4.00s/h to: **Maurice Randall, PO Bx 606, Charlotte, MI. 48813**

CMD's address can be found elsewhere in this issue. Next issue we will look at some scanning techniques that will improve your overall results.

## *The geoPublish Compendium!!*

The best \$4\*\* the serious "geoPublisher" will ever spend!

This ten page pamphlet--and supplement sheets--includes:

- \* How to find someone to do your laser printing, locally or by mail!
- \* How to set up your document for laser printing!
- \* Pitfalls and problems to look out for!
- \* Tips and tricks to create professional laser printed documents!
- \* Sample sheets of laser printed fonts!
- \* A laser printing resource guide!
- \* Tips on using Jim Collette's new Landscape Combo Disk!
- \* Much More!!!

\*\* (U.S. funds only. CA residents add sales tax. Overseas add 15%.)

## POWER USER BBS

*Power User subscribers check this out!*

The **POWER USER BBS** is for you. It gives you direct access to the writers and editor of the Power User Newsletter. It offers an extensive transfer library featuring the best and most recent of Public Domain and Shareware software, graphics and SID's. There are large message bases and separate message and file area just for subscribers only. POWER USER BBS also offers online games and many other features.

POWER USER BBS is running Omni 128 BBS on a C=128 computer, 4 meg Ramlink, HD-40 HardDrive, FD-2000 floppy drive a Swiftlink and USR 14.4 Sportster modem. POWER USER BBS is open to the public but is for the benefit of newsletter subscribers and Commodore computer users in general.

Call: **360-427-1083** to connect anytime. This is a free access BBS.

## *The Power User HELP Box*

Here are some undocumented JiffyDOS command shortcuts. At least I discovered these on my own and have never seen them documented anywhere. So if I am not the first to document these I apologize to those that are.

*Here is a shortcut to read the Real Time Clock(RTC) in ASCII format:*

@**"T-RA":@** The currently active drive must have an RTC installed for this to work or syntax error will occur.

*Change 1571 to 1541 mode:*

@**"UO>M0"**

*To change back to 1571 mode:*

@**"UO>M1"**

Also here is a tip for converting Koala graphics to Ipaint using Iport from Rick Kane. When a Koala file name is less than the number of spaces available for a name Iport will list the files in the directory but will give a file not found error when you type in the file name for the file to be converted. The solution is this: Say for example there are three blank spaces left at the end of the file name. *Type in the file name and then hit CTRL RVS ON and then SPACE the number of blank spaces then hit RETURN.* Iport will then load in the file for conversion. Also be sure and use the \* wildcard to avoid having to type in the long file names. The wildcard cannot be used in place of the above mentioned blank spaces, they must be typed in.

Only \$24.95

FOR THE C64 AND C128 IN 64 MODE

# FUN Graphics Machine

FUN GRAPHICS MACHINE (FGM) IS AN "ALL-IN-ONE" GRAPHICS PROGRAM FOR THE C-64. WHAT CAN BE CREATED WITH FGM IS ONLY LIMITED BY YOUR IMAGINATION. JUST A FEW EXAMPLES:

BUSINESS CARDS  
CUSTOM LABELS  
VIDEO TITLING  
NEWSLETTERS  
CALENDARS  
DIAGRAMS  
POSTERS  
FORMS

SIGNS  
CHECKS  
OVERLAYS  
BROCHURES  
LETTERHEADS  
CERTIFICATES  
GREETING CARDS  
DISK ENVELOPES

FUN GRAPHICS MACHINE SUPPORTS IMPORTING GRAPHICS AND HI-RES SCREENS FROM MANY POPULAR PROGRAMS INCLUDING:

KOALA  
GEOPAINT  
RUNPAINT  
PRINT SHOP  
ADV OCP ART  
VIDEO BYTE II

HANDYSCANNER 64  
COMPUTER EYES  
PRINTMASTER  
NEWSROOM  
GEOWRITE  
DOODLE

GEOS SCREENS CAN BE CAPTURED SIMPLY BY RESETTING COMPUTER THEN LOADING THE FUN GRAPHICS MACHINE.

The Mammals Who Make GEOS Better!

presents....

Thank you for supporting GEOS software developers. If you ever have a question or problem regarding any of our products, please let me know.  
Dave Ferguson

"Dweezil Never Bytes!"

One of our beta-testers said it best about this new geoPaint Desk Accessory: *"This is one program you have to use to appreciate, and once you use it, you'll LOVE IT!"* With all of the things GeoSTAMP can do for your geoPaint masterpieces, it is probably the most **underpriced** program we have ever sold! Stamp out multiple copies of small, geoPaint graphics with the speed and accuracy that cut-and-paste just doesn't have. Making mazes and floor plans is fast and fun! With GeoSTAMP your kids can enjoy the fun of stamp-pads without the mess! Create beautiful borders around your geoPaint works with ease!

\*Each GeoSTAMP file holds up to 30 stamp images which you pick up, carry around the screen, and place anywhere you want with a simple press of a button. You can even layer stamp images to create new, intricate designs. And since GeoSTAMP displays your position on the screen, you can fine place your image exactly where you want it! Invert it, flip it left-right or top-bottom, make it into a "cookie cutter", even "paint" with it! GeoSTAMP is so versatile, you'll think of a "bizillion" ways to use it!!

In addition to the main program, The GeoSTAMP Disk comes with two utility programs to help you create and edit stamp sets:

\* StampCollect is our favorite. With this Desk Accessory you can lift graphics right from a geoPaint screen! Use geoPaint's drawing tools to create stamps to add to your collection. Work with GeoSTAMP and StampCollect to build new stamp sets! Or "borrow" graphics from other geoPaint sources.

\* StampEdit is a fast, easy-to-use pixel editor for creating new stamps or for editing existing stamp sets. This is the Application the "real" GEOS artists will use.

\*Also on The GeoSTAMP Disk are as many stamp sets as we could fit, including borders, chess sets, a special puzzle game, and **more!!** You can go crazy building a maze with the maze sets; then let the Bach in you show thru with the two sets of music score-writing stamps!! Or throw together a quick monthly or weekly calendar!!! With the GeoSTAMP sets included, it's a snap!!!!

The disk that started it all...

## DweezilDisk 1

featuring

# NewTools2

The NewTools2 toolbox is layered over the bottom of the geoPaint screen.

NewTools was one of the most talked about GEOS Desk Accessories to come along in years, and with NewTools2--IT'S BETTER THAN EVER!!! Do things in GeoPaint that before you could only dream of: slant an object, tilt it, rotate it 45 degrees, make an arrow shape or an arch out of it, and **MORE!!** All of the best GEOS artists own NewTools2! NewTools2 is a MUST for the serious GeoPaint user!!

But that's not all you get on DweezilDisk 1. *You get all of these great tools also:*

\*Marker, a GEOS measuring tool Desk Accessory that lets you make fine "pencil" marks to locate your measurements.

\*CreatePatt, a new GEOS Desk Accessory that lets you create and save fill pattern sets using geoPaint.

\*PattDA, a GEOS Desk Accessory that loads fill pattern sets.

\*AutoPattA and AutoPattB, two Auto-Exec Applications which load fill pattern sets during GEOS boot-up or from the DeskTop.

\***PLUS....Over 90 fill pattern sets to get you started!!!**

Special  
News  
From.....

# Quincy Softworks

The Mammals Who Make GEOS Better!

"Dweezil Never Bytes!"

## BIGSTAMP!!!

Now there's **BIGSTAMP!!!** Twice the size of **GeoSTAMP!!! TWICE THE FUN!!!** **BIGSTAMPS** are BIG enough to hold a full Print Shop Graphic!! In fact, they're 96 pixels wide and 64 high!! And **There's More!!!** The **BIGSTAMP** Disk includes the NEW StampPrint application to print out your stamp collections!! **BIGSTAMP** does everything **GeoSTAMP** does, and more!!!! And **BIGSTAMP** is yours for only \$18.95. Current **GeoSTAMP** owners can upgrade for \$5.00. (US funds only; outside US/CANADA add 15%; CA residents add STATE sales tax.)

## DweezilDisk 3.5!!!

**DweezilDisk 3.5**, featuring **DweezilLabel 28**, is NOW available!! In addition to the features listed in the **DweezilLabel** flyer, **DweezilLabel 28** offers the following:

- \*\*\*\* 80 Columns in 128 mode!!
- \*\*\*\* Desk Accessories now chosen from a file selection box, not a menu!!
- \*\*\* Graphic labels can now be up to 2" high by 8" wide in 80 column mode!!
- \*\*\*\* Creates Merge Files for use with GeoMerge!!
- \*\*\* Creates Text Scraps in 2 different ways!!
- \*\*\*\* Loads Text Scraps created by other GEOS applications!!
- \*\*\*\* Searches for blank labels!!
- \*\*\* Offers 1, 2, or 3 columns when printing text labels!!
- \*\*\*\* Allows adjustable left margin for text labels!!
- \*\*\*\* Allows adjustable spacing between columns of text labels!!
- \*\*\* **DweezilLabel 28** works on both the 64 and 128 (40 or 80 columns)!!

Three \*\*\* represents an enhancement from the original **DweezilLabel**. Four \*\*\*\* indicate an exclusive feature of **DweezilLabel 28**.

### Look Below For More TOPDESK Screen Dumps!

If you wish to order **DweezilDisk 3.5**, please send \$20.95.

Original owners of **DweezilDisk 3** may upgrade for \$5.00. (US funds only; outside US/CANADA add 15%; CA residents add STATE sales tax.)

NOTE: Except for the **DweezilLabel** upgrade, **DweezilDisk 3** and **3.5** are the same.

### Four TOPDESK screens:

**Upper-left (C64 screen)** -- Directory listings from three drives placed in user defined windows.

**Lower-left (C64 screen)** -- These windows show the contents of folders (sub-directories) on a single drive.

**Upper-right (128 screen)** -- Four windows in the "small" mode. This mode halves the horizontal resolution of the icons, allowing more icons to be displayed. This is available only on the 128 in 80 column mode.

**Lower-right (C64 screen)** -- This is the way the windows appear when first opened one by one. The window for the first drive opened is on top, the second window is at the bottom, and the third and fourth layer themselves over the others.

# DweezilDisk 3!!

## Public Domain Revisited

### Yours For Only \$15.95!! \*\*

Selecting a font for layering label text over a scrap containing the geoPaint toolkit icons.

## DweeziLabel!!

The hottest GEOS label program to come along in years!!

- \* Print high resolution graphic labels or standard text labels!
- \* Save label data in files that hold 50 labels each, 6 lines per label.!
- \* Sort labels 7 different ways, like a data base!
- \* Import paint scraps to be used as labels, or use them as backgrounds for labels you create using almost any font you choose.
- \* Select form sizes from 1" to 11"!
- \* You chose which of the six lines to print!
- \* Print multiple copies of one label, or one each of a range of individual labels!

## MYgeoDIARY!!

How would you like to keep track of your exciting daily life just like Doogie Howser does? Well, now you can, with **MYgeoDIARY**, our completely revised auto-exec diary application! Each time you boot GEOS **MYgeoDIARY** will run, allowing you to make short entries of your daily happenings! These entries become part of a monthly geoWrite file which you can edit with.....geoWrite!! And if your life is boring, use it to save recipes or keep track of someone else's life that is more exciting! This new version works in 40 or 80 columns!! Get a life!! Then record it for posterity with **MYgeoDIARY!!!**

Just a little something I shared with MY diary!!

How many words can you find here?

## geoWORDS!!

You may have played this game in the "REAL" world! You may have played it in the Commodore world! **But you've never played it in the GEOS world!!!** **GeoWORDS**, the most exciting interactive word search game ever developed for GEOS. Play against the computer and up to four others! **GeoWORDS** comes with a ready-made list of **over 1600 words!!** Or start from scratch and watch the computer learn new words each game it plays. Let the computer pick the letter tiles, or enter your own letters!. Print out the game results and word lists. A **GREAT** learning tool for the whole family! **Once you start playing GeoWORDS you won't stop!!**

**Please Read:** **DweeziLabel** has been tested successfully on the printers most commonly used with GEOS. However, it has not been tested on printers which only use 7 pins and may not have satisfactory results. Earlier versions of the programs on **DweezilDisk 3** are part of the public domain. **GeoWORDS** is only slightly different from the original. **MYgeoDIARY** and **DweeziLabel** are completely revised programs. The new versions are NOT part of the public domain. All of the products advertised for sale in this publication are Copyright (C) 1990, 1991, 1992 by Quincy Softworks and David B. Ferguson.

The Mammals Who Make GEOS Better!

"Dweezil Never Bytes!"

# TOPDESK!!

The "Windows" DeskTop Alternative Is Finally Here!!!

Yours For Only \$19.95!! \*\*

Yesiree, Bob!! **TOPDESK** is here at last!! In English!! And even in 80 columns (if you have a 128)!! Yes, little friends, Dave and Dweezil have searched the world over to bring you this exciting import from Germany. They've been using it and loving it on their side of the ocean, and now it's time that we got a chance to enjoy this "windows" DeskTop alternative. What does it do, Dave? What features does it have? Features? You want features?? Boy, have we got features for you!!

\*\*\*\* Replaces DeskTop completely.

\*\*\*\* Supports up to four drives!! (REU required for 3 or 4 drives.)

\*\*\*\* View directories of all four drives at one time, with up to 16 files per window!!

\*\*\*\* Re-sizable, movable windows display directories by Icons, Date, Size, File-Type, or Name!!

\*\*\*\* Copy files between all four drives without drive swapping!!

\*\*\*\* Automatically swaps drives when needed for starting applications from drives C and D!!

\*\*\*\* Supports sub-directories (folders) on all disks!!

\*\*\*\* Supports 95% of original GEOS DeskTop functions including menus and keyboard shortcuts!!

\*\*\*\* C-64 and C-128 versions both included on one disk; 128 version supports 40 or 80 columns!!

\*\*\*\* Automatically switches to correct column mode when an application is run!!

Is **TOPDESK** the DeskTop alternative for you??

If you like icons, but want more than what DeskTop has to offer, then **TOPDESK** is the DeskTop alternative for you!! And **TOPDESK** is especially useful to users like Dweezil and I; we don't have a super big ram-drive or a hard drive, so **TOPDESK** makes perfect use of our "little" 2 meg reu and two real drives. Take a look at the screen dumps on this page and the reverse side and see if you don't think **TOPDESK** is the DeskTop alternative for you, too!!!!

Four drives open in Icon mode, C-64 screen. Files can also be viewed by Name, Date, Type or Size.

Using Small Icons and 80 columns, you can see up to 16 files at a time on two drives. 128 mode only.

The TOPDESK screen as it appears when GEOS is booted. Drives A and D are real; C and D are ram drives. See reverse for more screens.

**Please Read:** **TOPDESK** will work effectively with all GEOS configurations in both 64 and 128 modes. To get the most out of **TOPDESK**, however, a Ram Expansion Unit (REU) of at least 256K is recommended. \*\* CA residents add STATE sales tax; Quincy Softworks is the exclusive U.S. distributor for **TOPDESK**. This offer is available to U.S. and CANADA residents only!! Other purchasers should contact GEOS USER CLUB, c/o Thomas Haberland, Postfach 667, 5100 Aachen, GERMANY. **TOPDESK** was written by Walter Knupe, H. J. Ciprina, Ralf Bonse and Volker Goehrke.

# ULTIPATT!!

Introducing... **UltiPatt!!** *The most complete, comprehensive and versatile GEOS pattern tool ever created!!* NOT just a pattern editor! NOT just a pattern loader! Look at what this Desk Accessory can do:

- \*Load fill pattern sets created with almost any pattern editor!
- \*Use the pixel editor to edit or create patterns!
- \*Let your computer create patterns from random!
- \*Combine two patterns to make a new one!
- \*Or use any of the 1600 patterns **UltiPatt** has built into it!
- \*Pick and choose from all of these sources to develop pattern sets you can use right away, or save for later!!

*If you're serious about making GEOS patterns work for you, then you need **UltiPatt!!!***

# The geoGLOBE Collection!!

**geoGLOBE**, the global time and distance calculator, is now available in Desk Accessory and Application versions for both the 64 and 128!! Now everyone can enjoy the fun of knowing what time it is anywhere in the world! Or how far apart two cities are! Great to have during world crises! *A fantastic learning tool for the whole family!* Over 140 locations provided, or enter your favorite cities. Never wake up your overseas friends because you didn't know what time it was "over there"! Never be lost in the world again, with **geoGLOBE!!** (**DweezilDisk 2** contains all four versions of **geoGlobe**.)

Application version of geoGLOBE.

The demo screens feature the town of Pavilion, N.Y., where our friend Jim lives. It shows that Pavilion is 2,262 miles from our home in Hughson, CA. The Application screen dump was done at 11:25 P.M. our time; 2:25 A.M. at Jim's. A small dot on the map shows the approximate location of Pavilion; on the computer screen this dot flashes! The DA screen dump was done at 10:02 A.M. our time; 1:02 P.M. in New York.

Desk Accessory version of geoGLOBE with geoPaint in the background.

### Please Read:

The screen dumps are from C64 program versions; however, all programs work on both the 64 and the 128, and some 128 versions work in 40 and 80 columns.

NewTools2, Marker, CreatePatt, and GeoSTAMP are designed for use solely from within geoPaint. StampCollect is also designed for use within geoPaint, but may get successful results from within other programs also.

## Order Now!!

**DweezilDisk 1** is available for \$17.95\*

**DweezilDisk 2** is available for \$15.95\*

**GeoSTAMP** is available for \$13.95\*

*Quincy Softworks*  
9479 E. Whitmore Ave.  
Hughson, CA 95326-9745

\* Check or Money Order, U.S. funds only, CA residents add sales tax. Overseas add 15% for shipping and handling.

# geoCanvas 64 and 128 !!

## 80 column color for GEOS !

geoCanvas 128 3.0 supports color in 80 column mode on any Commodore 128 computer, whether it has 16K or 64K of video memory! GC128 lets you work in three different modes (takes advantage of available memory):

16K mono mode - 200 lines high, no color (Like geoPaint, good for 16K systems.)

16K color mode - 176 lines high, full color (Even better if you have 16K!)

64K color mode - 200 lines high, full color (The best yet! Requires a 64K video chip.)

geoCanvas 64 3.0 is also available, operating in 40 column mode on GEOS64 or GEOS128.

### Both versions:

Dynamic tool modules - Add and delete tools at will. Add 30 tools at once! Any author can write a tool for GC64 or GC128. Programming notes disk available (order below). Open three documents at once. Windows movable/resizable. Keyboard shortcuts under each tool. Ruler has tracelines for lining up objects. Edit tool can select entire window and can change color of region. Paint brush can have air brush effect. Window reaches bottom corner of screen so window can be 80% of screen. Multiple copy print box. Previews document over 360% faster than previous versions. Gridlines have new features and maximum size. All settings are remembered from one session to the next. And much more than can be listed here!

T. Gosser - "GC128 is VERY impressive!"

K. Kristiansen - "...this is one of THE best programs I have ever seen for this computer."

G. Doyon - "I think you have a real winner here. I have never enjoyed GEOS 128 like this before!! This is absolutely the best thing ever for GEOS 128!"

GC64 works in 40 column mode and requires a REU and GEOS64 or GEOS 128.

GC128 works in 80 column mode and requires a REU and GEOS128 (has all same features as GC64).

## Hickory-Dickory-Dock, SmartMouse has got a Clock!

For years, Commodore set the standard with the 1351 Mouse. Now CMD has set a new standard with the SmartMouse. Guaranteed 100% 1351 compatible, the SmartMouse does everything the C-1351 does and more! This highly-intelligent device includes a built-in battery-backed Real-Time Clock, and a double-click feature for GEOS. Plus, it comes with a complete set of utilities, including: Auto-exec for setting the GEOS clock, a Desk Accessory for setting the mouse clock from GEOS, and BASIC utilities for setting the clock and displaying time and date on screen. In addition to new features, the SmartMouse's ergonomic design makes it lighter, smoother and smaller than its outdated counterpart. So, if your old mouse is losing the rat-race, get out of that trap with SmartMouse!

## SCSI Hard Drive for the C64 & C128

HD Series Hard Drives are available in capacities up to 200 MB, are fully partitionable, and can emulate 1541, 1571, & 1581 disks while Native partitions utilize MSDOS-style subdirectories. HD's connect easily to the serial bus or parallel via RAMLink. Includes built-in JiffyDOS, SWAP feature and Real-Time-Clock. HD Series Drives offer superior compatibility with most commercial software including BBS, Productivity and GEOS. And with new pricing, HD Series drives offer the lowest cost/MB of any C64/128 storage device.

## 1.6 MB and 3.2 MB 3.5" Floppy Disk Drives

The FD-2000 and FD-4000 disk drives utilize today's latest 3.5 inch technology. FD-2000's support 800K (1581 style) and 1.6 MB (High Density) formats, while the FD-4000's offer support for the 3.2 MB (Enhanced Density) format as well. Fast and reliable, they support 1541, 1571 and 1581 style partitions, Native Mode partitioning and can actually read and write 1581 disks. FD's feature built-in JiffyDOS, SWAP button and optional RTC. High capacity, speed and compatibility make the FD right for every application, including GEOS.

## JiffyDOS™ Speeds up disk access by up to 1500% while retaining 100% compatibility with software

- Speeds up Loading, Saving, Verifying, Formatting and Reading/Writing of Program, Sequential, User and Relative files unlike cartridges which only speed up Loading and Saving of PRG files
- Built-in DOS Wedge plus 17 additional features including file copier, text dump, printer toggle, and redefinable function keys make using your computer easier and more convenient
- ROM upgrade installs easily into most computers and disk drives. Supports C-64, 64C, SX-64, C-128, 128-D, 1541, 1541C, 1541-II, 1571, 1581 and more.

## Power-Backed Expandable REU

The fastest possible form of storage, RAMLink provides instant access to files and retains data while your computer is turned off. Easy to use and expandable up to 16 MB, RAMLink utilizes the same powerful operating system found in the HD. RAMLink also offers built-in JiffyDOS, SWAP feature, reset button, enable/disable switch, pass-thru port and RAM port for REU/GEORAM use. Ideal for those requiring maximum speed, expandability and compatibility with all types of software and hardware including GEOS.
