**This directory is dedicated to the many Sys Ops who, through the years, have dedicated their time and expertise to insure that each program meets the highest standards of quality and value.**

# HOW TO USE THE DIRECTORY

The Q-Link Public Domain Software Directory makes downloading fast and easy by allowing you to browse through the libraries offline.

This 1990-91 Directory includes all public domain files in the Q-Link "Software Libraries" found in the COMMODORE SOFTWARE SHOWCASE and the COMMODORE INFORMATION NETWORK. We have also included the files in the GEOS Arena, and the Education Software Libraries.

Information on each file includes its subject heading (in bold), the filename, the name of the person who uploaded the file, and the date the file was uploaded. Each chapter corresponds to a different Q-Link library section.

The chapter is then divided into the same categories as the online libraries. The files are listed under each category in alphabetical order by subject heading.

For example, if you are looking for an arcade game for your C128, check the Table of Contents for C128 Software and find the chapter titled Game Room. Under that chapter, find the category called Arcade. Under Arcade, you will find additional subdivisions such as Strategy. If you go to the page number listed next to Strategy, for example, you will find all of the Strategy game files in alphabetical order. Scan down through the page until you find a subject heading that interests you.

When you find a file you want to download, sign on to Q-Link, go to Software Libraries in the COMMODORE SOFTWARE SHOWCASE or COMMODORE INFORMATION NETWORK and select Download a Specific File. Then select Download A File, and enter the name of the file to be downloaded and press RETURN. You will be able to read basic information about the file (download time, other files needed, etc.) and then download the file directly. For more on downloading, see page 3.

If you want the complete description on a file listed in the Directory, go to the Software Libraries on Q-Link, select Browse C64 Software (or C128 or Amiga) and the appropriate library. Next, select List by Filename." You will see a menu with ranges of dates. The date on the file in the Directory will tell you which option on the "Date" menu to choose. When you find the filename on the menu, move the check mark next to it and press F1. The description for the file will appear.

**NOTE: Public Domain files listed in this directory with an asterisk have been selected by our SysOps as "Top Picks."**

# HOW TO UPLOAD A FILE

If you have a software gem that you would like to share with other Q-Link members, upload it to the Q-Link Public Domain Software Library ... FREE!

Here's how you do it:

Sign on to Q-Link, go to the **COMMODORE INFORMATION NETWORK** or the **COMMODORE SOFTWARE SHOWCASE** and select **Software Libraries**. On the **Software Libraries** menu, select **Upload a File Free** to see the software libraries (C64, C128, Amiga, PC/MS DOS).

Decide in which library your program belongs. Next, choose the appropriate software category within the library (Music, Games, etc.)

On the next menu, select **Submit a new file for this area**. Q-Link will ask you for the name of the file you wish to upload. This filename must be the exact name of the file on your floppy disk. Type in the filename and press **RETURN**.

You will then see a screen on which you can type in a description of the file you are uploading. Your description should state that the file is in the public domain and should include a meaningful explanation of the file; for example:

"This is the documentation file for..."

"This is the second of four files..."

"This is a disk utility program that gives you the option of printing to the screen or printer..."

After you finish typing the program description, insert your disk for the file, press the **F7** key and select **Send your message to Q-Link**.

The file you upload **WILL NOT** appear in the Software Library immediately. It will be made available to the public by the SysOps of the particular library within a few days.

# HOW TO DOWNLOAD A FILE

To download a file (transfer it from our computer to yours), sign on to Q-Link, go to the **COMMODORE INFORMATION NETWORK** or **COMMODORE SOFTWARE SHOWCASE** and select Software Libraries. Make sure you have a formatted disk handy (see page 4 for information about formatting).

## DOWNLOAD A SPECIFIC FILE

By using the Software Directory to locate files in which you are interested, you can quickly download software from Q-Link.

When you find a file in the Directory that you want to download, select Download a Specific File from the Software Libraries menu and then select Download a File. Type in the filename and press RETURN. Then type in the name of the person who uploaded the file and press RETURN.

Q-Link will check to make sure the file is available. If it is, a file description appears. Insert a formatted disk to receive the file, then press RETURN and the file will be downloaded to your disk. A bell will ring on your Commodore telling you when the download is complete (available on version 3 and 4 disks only). If it is not available, an error message appears. Press F5 to cancel the message.

## BROWSE THE LIBRARIES

If you don't have a specific file in mind, or if you want more information about a file you have selected from the Directory, select the Browse option (for C64, C128, or Amiga software) from the Software Libraries menu.

Choose the library that interest you and select the appropriate software category. You can then choose to see the files by filename (the name given to the file by the person who uploaded it) or by subject (a general name which more clearly defines what the software does).

Either choice will give you a menu of dates. The dates correspond to when the file was uploaded. Just select the date you need and press the F1 key. To read about a file, select the filename and press the F1 key again. The file description is displayed on your screen.

If you wish to download the file, press the F7 key. A menu display gives you the options to read or post comments about the file, get documentation for the program (if available), or download the program.

To download the program, select Download This File. Q-Link will prompt you to insert a formatted disk to receive the file, then press RETURN to download the file.

## SEARCH THE LIBRARIES

The library search system allows you to search all the files in a given set of software libraries. This gives you the ability to quickly locate specific files from the thousands that are available.

To use the search system, go to the Software Libraries and select Search the Libraries from the main menu. After selecting the specific library that interests you (i.e. C-64 Files, GEOS Files, Amiga Files, etc.), you have options to Search All Files, Search Files New This Week, or to Search Files New This Month.

With the Q-Link search system, you can search by subject, filename, uploader name, or keywords.

Keywords are search words assigned to each library. For example, the disk utilities library online has the keywords "disk," "utility," and "application."

In addition, you can search by time period, new files this week, new files this month, or all files in the library.

The words "AND," "OR," and "NOT" can also be used in any combination to join words and phrases together. As an example, if you are looking for a trivia game, you could type "trivia and game." This will find all trivia game files.

Using "OR" will allow you to find files which contain one or both of the specified words. Continuing the example, you can expand your search by using the phrase "trivia or game". This will find all trivia files and game files.

To narrow your search, you can use "NOT." For example, if you use the phrase "trivia not game" you will only find trivia files. All trivia game files will be excluded.

# HOW TO FORMAT DISKS

To save files on a new disk, the disk must be formatted. Here's how to format a disk:

1. Power on your system. (If you own a Commodore 128™, hold down the Commodore key to boot up in C64 mode.
2. Place the blank disk you wish to format in the drive and close the drive door.
3. Type: `OPEN15,8,15,"NO:diskname,id":CLOSE15`

Diskname is any name you wish to use up to 16 characters. The id is any two characters that the drive uses to identify the disk. An example of a diskname and id is "GAMES1,G1".

4. Press the RETURN key.

The flashing cursor on your screen will disappear for about 70 seconds while the drive is formatting the disk. The cursor returns when your computer reaches and executes the CLOSE command. After your disk is formatted, you will be able to download files from Q-Link.

**NOTE:** Formatting a disk will erase all existing files on that disk. You only need to format a disk the first time you use it unless you wish to erase all existing files and reuse the disk.

## SPECIAL PUBLIC DOMAIN FILES

Many filenames in the public domain libraries end with a period (.) followed by a suffix that denotes something special about the file. Usually, it means the file was created or modified by a utility program.

Many of the Q-Link public domain files are made up of several separate files that are condensed in some way to make downloading faster.

Q-Link's Omega-Q<sup>sm</sup> file, available in the Q-Link Utilities section of the COMMODORE INFORMATION NETWORK'S Software Libraries, performs the most common disk operations in just a few easy steps, including expanding files so they are ready to use without other modifying programs. This single utility file combines nearly all the incompatible archiving utilities and simplifies the programs for easy operation.

This file works much like Q-Link, with check marks and the four function keys guiding you to most commands. You can also use Omega-Q for formatting disk set-up, loading programs, reading disk directories and a doing a variety of other disk "housekeeping" duties.

Some GEOS™, Amiga, and CP/M™ files cannot be expanded using Omega-Q. For more information on these files, ask for help using these programs at the COMMODORE INFORMATION NETWORK'S Downloading Help Desk, or in CIN'S Computing Support Groups.

# ABOUT THE LIBRARIES

All files under C64, C128, and Amiga in this Software Directory can be found in the Software Libraries area of the COMMODORE INFORMATION NETWORK and COMMODORE SOFTWARE SHOWCASE.

Files in the GEOS Libraries can be found in the GEOS Arena in the COMMODORE SOFTWARE SHOWCASE. To use these files, you must have a copy of the GEOS desktop environment and/or the particular application (e.g. geoWrite or geoPaint). New Product Information files contain catalogs, product descriptions, and demonstration software. These files can be found in the Software Buyer's Guide in the COMMODORE SOFTWARE SHOWCASE.

Commodore Educational Software are education programs produced by Commodore and released to the public domain. These files can be found in the LEARNING CENTER under Educational Software.

Q-Link also offers some public domain programs NOT listed in this Directory. Check online for software libraries located in JUST FOR FUN and NEWS AND INFORMATION.

**NOTE: This compilation of software files was gathered on September 20, 1990.  
Some files since then may have been deleted or updated.**
