**HOW TO OPERATE
THE FINANCIAL COOKBOOK
PROGRAM**

ELECTRONIC ARTS™

For additional information, see the manual located inside the front cover of the package.

1. Turn on the disk drive, turn on the computer, and insert the program disk. Type LOAD "EA",8,1 and then press **Return**. When the program finishes loading, press **Return** to bring the Index of Recipes into the screen display window.
2. Use the cursor movement keys to move the highlight from recipe name to recipe name. Press **Return** to bring the highlighted recipe onto the screen.
3. Type in a number, then press **Return** to move the highlight to the next item. Use the up cursor key to move back up so you can change an entry. The computer will automatically erase what's already there as soon as you begin typing a new number.
4. Press **←** to enter the command menu (the second line from the bottom of the screen) and **Return** to use the Compute command. Generally the display will jump back to an answer summary at the top of the table when the computation is complete.

SCROLLING THE DISPLAY

To see parts of an answer or table which extend beyond the screen display window, use the cursor movement keys as though you were

trying to move the highlight off the top or bottom of the window. Press **←** twice to go immediately back to the top of the recipe.

THE COMMAND MENU

Press **←** to enter the menu, use the cursor movement keys to select the command you want and press **Return** to do it. For more information, see A Summary of Financial Cookbook Commands in the manual.

USING THE PRINT COMMAND

The Print command tells your printer to print everything from the title of the recipe in the display to the last line of its table. If that amount is longer than 66 lines, you must have continuous form paper in your printer to accommodate the output. If your printer prints everything on the same line, use the Profile command to change the "Send printer linefeeds" answer from "NO" to "YES".

USING THE PROFILE COMMAND

Some entries – interest rate, inflation rate, etc. – come up in virtually every recipe. Use the Profile command to enter and save numbers for those items which you would like to have entered automatically each time you use a recipe calling for them. For more information, see the description of the Profile command in A Summary of the Financial Cookbook commands in the manual.

Limited Warranty

Electronic Arts warrants to the original purchaser of this computer software product that the recording medium on which the software programs are recorded will be free from defects in materials and workmanship for ninety days from the date of purchase.
